7. STATEMENT OF REASONS

Description of the development	The proposed development is for Reconfiguring a Lot (four lots into four lots)
Reasons for Decision	<p>a) The proposed boundary realignment does not compromise the strategic framework in the <i>Rockhampton Region Planning Scheme 2015</i>;</p> <p>b) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity;</p> <p>c) The proposed development does not compromise the relevant State Planning Policy; and</p> <p>d) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.</p>
Assessment Benchmarks	<p>The proposed development was assessed against the following assessment benchmarks:</p> <ul style="list-style-type: none">• Low Impact Industry Zone Code;• Access, Parking and Transport Code;• Filling and Excavation Code;• Landscape Code;

	<ul style="list-style-type: none"> • Reconfiguring a Lot Code; • Stormwater Management Code; • Water and Sewer Code; and • Flood Hazard Overlay Code; 			
Compliance with assessment benchmarks	The development was assessed against all of the assessment benchmarks listed above and complies with all of these with the exception listed below.

No water works are proposed as part of the application. However, an extension to the existing sewer main to service Lot 6 is proposed. As the application is for a boundary realignment it is not anticipated that the proposal will adversely affect the functionality of the existing accessibility to water and sewerage supply systems. Furthermore, the current use of the land is not intensifying as a result of the proposal which would warrant an upgrade to the current water and sewer supply arrangement. Both water and sewer infrastructure is available in the vicinity for connection or upgrades if the sites were to be further developed in the future.</p> <p>Therefore the proposal is considered to achieve the performance outcome.</p> </td> </tr> </tbody> </table>	Assessment Benchmark	Reasons for the approval despite non-compliance with benchmark	Reconfiguring a Lot Code
