<http://www.rockhamptonregion.qld.gov.au/PlanningBuilding/Development-Applications/Lodging-a-Development-Application/As-Constructed-Submissions> as to how to submit the data and then email to [enquiries@rrc.qld.gov.au](mailto:enquiries@rrc.qld.gov.au) with a cover note detailing the Development Application No., legal description of the land, address, estate/subdivision name and stage, consultants name and contact details. -

Any works that involve the alteration of ground surface levels (cut/fill) require spot heights and any digital elevation models and/or line work in digital AutoCAD format over the affected lots/site (refer As Constructed Data Guidelines – 5.6).

### **Compliance/Certifications (CMDG – CP1.21)**

Council requires that the As Constructed documentation be supported by appropriate certifications in accordance with the following requirements.

- a) All surface As Constructed infrastructure (i.e. sewer manholes, kerb etc.) must be surveyed in relation to property boundary's by a Registered Surveyor upon completion of the project. Other As Constructed infrastructure which is constructed before the completion of the project (i.e. sewer jump ups, water reticulation bends etc.) can be surveyed by the contractor. The certification must note that the As Constructed survey data represents the true and accurate location of the relevant construction element presented in the data, relative to all appropriate survey datum's (i.e. the exact location in space of each construction element/entity). An RPEQ's certification must accompany the As Constructed submission to Council. The RPEQ's certification may qualify where information has been supplied by a contractor for covered up works (e.g. sewer jump up locations).
- b) Council accepts the submission of As Constructed information for the location of House Connection Branches documented by the Contractor during the construction phase. This enables the Contractor to expedite the backfilling of these fixtures and will minimise "open excavations" awaiting final survey. This information shall be documented on the As Constructed Sewerage Plan and shall reference the Contractor's field notes used to document the As Constructed information.
- c) All As Constructed works must also be certified by the Consulting Engineer responsible for design of the works. The certification must note that the design intent and function of the proposed works have not been compromised by the constructed works. To this extent, the Consulting Engineer will be responsible for checking the As Constructed details so that the tolerances for construction are within specified limits.
- d) It is recognised that in some circumstances, the tolerances for construction are exceeded. In these instances, the Engineer will be responsible for performing confirmation design calculations to ensure that the original design intent and function are not compromised.
- e) Further, should the As Constructed details indicate a change to the design intent or function of the works, revised design calculations shall be provided by the Consulting Engineer to indicate the acceptability of the proposed change relative to Council's requirements. Council's approval of the change is required prior to the formal acceptance of the works.
- f) The Consulting Engineer shall be responsible for the completion of the "Statement of Compliance - As Constructed works", which satisfies the requirements for Certification.

By submitting the As Constructed information to Council, the Consultant grants Council a royalty-free, perpetual, non-exclusive, non-cancellable, non-transferable licence to:

- a) use, reproduce, adapt, modify, commercially exploit and communicate the Intellectual Property (including by development and distribution of a Derivative Product); and
- b) sublicense Council's right to use, reproduce, adapt, modify, commercially exploit and communicate the Intellectual Property, subject to the terms of this Licence.

Interpretation of the above intellectual property condition will be subject to the following definitions:

**"Intellectual Property"** in relation to the As Constructed information, includes all copyright, and all right in relation to registered and unregistered trademarks (including service marks), registered designs and confidential information (including trade secrets and know-how), and all other right resulting from intellectual activity in the industrial, scientific, literary or artistic fields; and

**"Derivative Product"** means a distinct product in which the Intellectual Property is altered, abridged or supplemented, and/or which incorporates additional functionality.
