8. STATEMENT OF REASONS

| Description of the development | The proposed development is for a Material Change of Use for a Health Care Service | |
|---|--|--|
| Reasons for Decision | a) The Health Care Service is small scale and anticipated to service the needs of the local residential community; | |
| b) The development provides sufficient on-site parking to meet generated by the development, and maintain the safety and cap Street; | | |
| | c) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity; and | |
| | d) On balance, the application should be approved because the circumstances | |

| | Assessment Benchmark | Reasons for the approval despite non-compliance with benchmark |
| | Low Density Residential Zone Code | PO14 The development does not achieve Acceptable Outcome 14.1 as it includes vehicle parking facilities in front of the building rather than behind or beneath the building. Despite this, the majority of the seven (7) parking spaces provided for the development are located behind the building, with only two (2) spaces located in front. Due to the size of the site, it is impractical for all of the car parking spaces to be located behind the building while ensuring a sufficient number of spaces are provided. Furthermore, the parking spaces at the front will be concealed from Fitzroy Street behind a 1.2 metres high screen fence along the frontage boundary to ensure an attractive streetscape and built form of parking facilities is provided. |

The use will only operate during the daytime business times of 0800 hours to 1700 hours from Monday to Saturday and will only be approximately 104.8 square metres in size. The development is considered small scale and is anticipated to maintain the residential character and amenity of the surrounding area. Furthermore, the development does not adjoin an existing centre zone and is not anticipated to compromise the role or function of centres. The development will present as a two-storey building which is consistent with the surrounding built form and streetscape. The development is located in close proximity to Canning Street, which is a public transport route with a bus stop located within 120 metres of the subject site. The development will gain access to Fitzroy Street, which is categorised as a higher order road in Council's road hierarchy, which is suitable to accommodate the subject development whilst not adversely affecting the capacity or safety of the local road network. |
| | Access, Parking and Transport | PO5 The development does not achieve Acceptable Outcome 5.1.1 which |

| | Code | recommends eight (8) car parking spaces to be provided for both the Health Care Service and Dwelling Unit to be located on the second floor of the building. As an alternative solution the development provides a total of seven (7) spaces, with six (6) spaces dedicated for use by the Health Care Service and one (1) space for the Dwelling Unit, resulting in an overall shortfall of one (1) parking space. The development will provide the recommended number of spaces for visitors and staff of the Health Care Service. The one (1) parking space shortfall is related to the recommended inclusion of two (2) spaces being for a special use vehicle such as for blood collection and a separate space for emergency services vehicles. The development proposes one (1) space to service both of the aforementioned types of vehicles. As the development is considered small in scale, the number of on-site parking spaces provided is expected to be sufficient to meet the demands generated by the development. |
|--|---------------------|--|
| | Landscaping Code | <u>PO6</u> The development does not achieve Acceptable Outcome 6.5, which recommends that planting be carried out to create a three-tier landscaping treatment including trees, shrubs and groundcovers. |
| | | As the development is small scale a three-tier planting treatment is not considered necessary. However, the development provides over 10 per cent of the site as landscape area that complies with Acceptable Outcome 24.1 of the Low Density Residential Zone Code. Furthermore, landscape areas will be designed in accordance with SC6.12 - Landscape Design and Street Trees Planning Scheme Policy and will predominantly use locally native species that have a low-water dependency. Additionally, condition 9.4 has been imposed to ensure either trees, shrubs or groundcovers are established and at suitable planting density rates. Therefore, the landscape design is anticipated to be of a suitable size to achieve the purposes of this code and will complement the development. |
| | | PO11 |
| | | The development does not include shade trees within the car park areas, which does not achieve the recommendations, included in Acceptable Outcomes 11.1 through to 11.6. |
| | | However, the development has provided sufficient landscaping areas, which are located adjacent to the parking spaces at the front and adjacent to the rear carpark's access. Additionally, condition 9.4 has been imposed to ensure either, shrubs, groundcovers or trees are provided in these landscape areas and at appropriate densities as recommended in Acceptable Outcome 6.5 of the subject code. Furthermore, it is noted that the on-site car parking areas will have the visual buffer of a 1.2 metres high screen fence along the site's front boundary and a 1.8 metres high screen fence along the site's side and rear property boundaries. |
| | | As the site is small in scale it is not anticipated that the development's car parking areas will generate substantial glare or heat. Furthermore, the landscaping areas provided are anticipated to deliver a positive design outcome, which will enhance the overall appearance of the development. |
| Matters prescribed by regulation | | ampton Region Planning Scheme 2015 (version 2.1); and on material, being the material submitted with the application. |
