8. STATEMENT OF REASONS

Description of the development	
	Reconfiguring a Lot (one lot into two lots)

Reasons for Decision	<p>a) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity; and</p> <p>b) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.</p>	
Assessment Benchmarks	<p>The development was assessed against the following assessment benchmarks:</p> <ul style="list-style-type: none"> • Strategic Framework; • Medium Impact Industry Zone Code; • Low Impact Industry Zone Code; • Access, Parking and Transport Code; • Filling and Excavation Code • Landscape Code; • Reconfiguring a Lot Code • Stormwater Management Code; • Water and Sewer Code; • Bushfire Hazard Overlay Code; • Flood Hazard Overlay Code; and • Steep Land Overlay Code. 	
Compliance assessment benchmarks	with	The development was assessed against all of the assessment benchmarks listed above and complies with all of these with the exception listed below.
	Assessment Benchmark	Reasons for the approval despite non-compliance with benchmark
	Flood Hazard Overlay Code PO14	<p>The subdivision does not comply with Performance Outcome PO14 as it will create a new lot affected by the Flood Hazard Overlay when compared to the current circumstances. Despite this conflict with the performance outcome, there are several factors which indicate that the level of risk is low and that the development will not worsen the likelihood or severity of flood hazard on the subject site.</p> <p>Despite creating an additional lot, the development does not increase the number of lots that are flood affected but instead segregates the eastern part of the land, which is not flood affected, from the western part of the land, which is flood affected. In this sense, the subdivision will alter the existing lot from a single parcel of land which is partially flood affected and will convert it into two separate lots, one of which is flood affected (proposed Lot 6) and one which is not (proposed Lot 5).</p> <p>Whilst the subject site is affected by Creek Catchment Flooding Planning Areas 1 and 2, only a small part of proposed Lot 6 is affected. Proposed Lot 5 is not impacted by flood hazard while</p>

	<p>proposed Lot 6 will retain sufficient area that is flood free and available to be safely developed. Furthermore, analysis of the draft Planning Scheme major amendment shows that changes to the Flood Hazard Overlay will see the total area of flood affected land significantly reduced based on the updated flood modelling data.</p> <p>The applicant also proposes a drainage easement which would prevent development on parts of the land that would potentially flood and allow for safe and sustainable drainage of water from the site along natural flow paths without alteration.</p> <p>Based on the above factors, the development is compatible with the level of risk associated with the flood hazard on site. The subdivision will not worsen the potential impacts of flooding nor increase the likelihood of flooding occurring on the subject site or adjoining land. Overall, the subdivision will not increase the risk to people or property from flood hazard. Therefore, the subdivision achieves the overall outcomes of the Flood Hazard Overlay Code and circumstances favour Council using its discretion to approve the development despite conflict with a single performance outcome.</p>	
Relevant Matters	<p>The proposed development was assessed against the following relevant matters:</p> <ul style="list-style-type: none"> The Draft Major Amendment to the Planning Scheme which will alter how the Flood Hazard Overlay affects the subject site, specifically in relation to Creek Flood Planning Areas 1 and 2. 	
Matters raised in submissions	<p>Issue</p>	<p>How matter was dealt with</p>
	<p>Potential future flood impacts from the Rockhampton Ring Road Project</p>	<p>The Rockhampton Ring Road Project which is for the construction of state road transport infrastructure on land designated for a future state transport corridor and is not assessable development under the Planning Scheme. The proposed subdivision is not related to the road construction project and can only be assessed on the merits of the subject application and the current related circumstances. Assessment of the subdivision cannot be made based on undefined potential impacts that may or may not result from a state transport infrastructure project, which cannot be made assessable development in accordance with Schedule 6 of the <i>Planning Regulation 2017</i>. The applicant is not responsible for any potential flooding or drainage impacts which may result from the state transport infrastructure project.</p>
	<p>Access should not be through land impacted by flood hazard</p>	<p>No access is proposed to Bush Crescent as part of the application. Proposed Lot 5 will continue to use the existing crossovers to Wade Street and McLaughlin Street while proposed Lot 6 has flood-free road frontage access to Wade Street in the South Western portion of the site. Neither proposed lot will gain access through flood affected land or areas designated for a watercourse or drainage.</p>

	Access and impacts on street traffic	The subdivision does not include any proposal for additional constructed accesses or crossovers to any road frontage compared to what is existing. Application material indicates the intention for proposed Lot 5 is to continue using the existing crossovers to McLaughlin Street and Wade Street, which service the existing use on site. Proposed Lot 6 is intended to utilise access from Wade Street in future. No access is proposed from Bush Crescent as part of the proposed subdivision. Future access arrangements are likely to be further impacted by the construction of a future state transport corridor (i.e. the Rockhampton Ring Road project) which is nominated to occur on land immediately to the west and north west of the subject site. Any future impacts on the local road network would be considered as part of future development for Reconfiguring a Lot or Material Change of Use and assessed accordingly at that time.
Matters prescribed by regulation	<ul style="list-style-type: none"> • The <i>Rockhampton Region Planning Scheme 2015</i> (version 2.2); and • The common material, being the material submitted with the application.
