6. CURRENCY PERIOD FOR THE APPROVAL (s.85 of the *Planning Act*)

The standard currency periods stated in section 85 of *Planning Act 2016* apply to each aspect of development in this approval, if not stated in the conditions of approval attached.

7. STATEMENT OF REASONS

Description of the development	The proposed development is for a Material Change of Use for a Dwelling House
Reasons for Decision	<ol style="list-style-type: none"> a) The proposal has been designed and constructed in a manner that will minimise impacts from steep land and nearby extractive industries; b) The proposed use does not compromise the strategic framework in the <i>Rockhampton Region Planning Scheme 2015</i>; c) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity; d) The proposed development does not compromise the relevant State Planning Policy; and e) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.
Assessment Benchmarks	<p>The proposed development was assessed against the following assessment benchmarks:</p> <ul style="list-style-type: none"> • Rural Zone Code; and • Steep Land Overlay Code.

Compliance with assessment benchmarks	The development was assessed against all of the assessment benchmarks listed above and complies with all of these with the exceptions listed below.	
	Assessment Benchmark	Reasons for the approval despite non-compliance with benchmark
	Rural Zone Code	<p>The proposed dwelling house will be located approximately 650 metres from an operational hard rock quarry. Blasting techniques implemented by the quarry are considered to be low impact with all precautions undertaken to minimise noise and dust pollution. Within proximity of the quarry are a number of significant uses including the Bruce Highway being located within 400 metres, the North Coast Railway Line within 200 metres and several other dwellings located within one (1) kilometre of the quarry all of which currently operate with no disturbances or issues.</p> <p>In addition, it is noted that the proposed location of the dwelling house is separated from the quarry by an approximate 600 metre wide natural ridge running from north to south between the sites. The ridge is identified as being approximately 50 metres higher than the building location and roughly 90 metres higher than the quarry work site and is covered by dense natural vegetation which acts a noise and dust barrier.</p> <p>In order to minimise any potential impacts including noise and vibrations from blasting techniques used within the quarry operation, the applicant proposes to construct the dwelling using a steel stud frame with high density acoustic bats, 53mm Mg0 EPS-FR core SIPS flooring panels on a steel frame structure, extra bracing between floor columns and insulated roof panels.</p>
Steep Land Overlay Code	The slope stability report prepared by a certified Geotechnical Engineer has addressed the steep land requirements. The proposed dwelling house will be designed in accordance with the slope stability report to ensure the long-term stability of the development site.	
Matters prescribed by regulation	<ul style="list-style-type: none"> • The <i>State Planning Policy – Part E</i>; • The <i>Central Queensland Regional Plan</i>; • The <i>Rockhampton Region Planning Scheme 2015</i>; • Surrounding use of adjacent premises in terms of commensurate and consistent development form; and • The common material, being the material submitted with the application.
