### 7. STATEMENT OF REASONS

<b>Description of the development</b>	The proposed development is for a Material Change of Use for a Dwelling House
<b>Reasons for Decision</b>	<p>a) The Dwelling House will be provided with a suitably designed access, which will facilitate safe and efficient access and egress during a bushfire event for both emergency services vehicles and occupants;</p> <p>b) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity; and</p> <p>c) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.</p>
<b>Assessment Benchmarks</b>	<p>The proposed development was assessed against the following assessment benchmarks:</p> <ul style="list-style-type: none"><li>Bushfire Hazard Overlay Code.</li></ul>

<b>Compliance with assessment benchmarks</b>	The development was assessed against all of the assessment benchmarks listed above and complies with all of these with the exception listed below.	
	<b>Assessment Benchmark</b>	<b>Reasons for the approval despite non-compliance with benchmark</b>
	Bushfire Hazard Overlay Code (PO1)	<p>The development will upgrade the existing unnamed Council road reserve to four (4) metres wide and constructed to an all-weather standard, which complies with Acceptable Outcome (AO) 1.1.2(a). Both the unnamed Council road reserve and the site's internal driveway will have a working area within three (3) metres on either side of the constructed access to remove all hazardous vegetation in this area. Additionally the property owner will be required to manage vegetation to ensure a vertical clearance of 4.8 metres is maintained above the constructed access.</p> <p>The applicant has proposed minor earthworks to occur in short sections of the site's internal driveway in order to achieve a suitable slope gradient of less than 12.5 per cent to comply with AO 1.1.2(b). The site's internal driveway will be approximately 280 metres in length and includes five (5) turning circles. Despite the driveway exceeding the maximum length specified in AO 1.1.2(c), the turning circles provided have been suitably located and designed to facilitate the safe and efficient access and egress by emergency services vehicles during a bushfire event. Additionally the location and design of the development's access is anticipated to facilitate the safe evacuation of occupants during a bushfire event.</p>
<b>Matters prescribed by regulation</b>	<ul style="list-style-type: none"> <li>• The <i>Rockhampton Region Planning Scheme 2015</i> (version 2.1); and</li> <li>• The common material, being the material submitted with the application.</li> </ul>
