

# **Rockhampton Regional Council Adopted Infrastructure Charges Resolution (No. 3) 2014**

---

## **Part 1 Introduction**

### **1.1 Sustainable Planning Act 2009**

- (i) The resolution is made pursuant to the *Sustainable Planning Act 2009*.
- (ii) The resolution is to be read in conjunction with the following:
  - (a) State planning regulatory provision (adopted charges);
  - (b) applicable local planning instruments.
- (iii) The resolution is attached to but does not form part of the applicable local planning instruments.

### **1.2 Effect**

The resolution has effect on and from 3 March 2014 and applies to development application decisions made on or after this date.

### **1.3 Purpose of the resolution**

The purpose of the resolution is to establish an *adopted infrastructure charge* for the following trunk infrastructure networks:

- (a) water supply network;
- (b) sewerage network;
- (c) transport network;
- (d) stormwater network; and
- (e) parks and community land network.

### **1.4 Interpretation**

***applicable local planning instruments*** means the following:

- a) Fitzroy Shire Planning Scheme 2005
- b) Mount Morgan Shire Planning Scheme 2003
- c) Rockhampton City Plan 2005

***bedroom*** means an area of a building or structure which:

- a) is used, designed or intended for use for sleeping but excludes a lounge room, dining room, living room, kitchen, water closet, bathroom, laundry, garage or plant room; or
- b) can be used for sleeping such as a den, study, loft, media or home entertainment room, library, family or rumpus room or other similar space.

***dwelling unit*** means any part of a building used for residential accommodation of one household which is self contained.

***consumer price index*** means the Consumer Price Index: All Groups Index for Brisbane available from the Australian Bureau of Statistics. The base date is September 2011.

***Education establishment for the Flying Start for Queensland Children program*** means any educational establishment or part of an educational establishment that is for, or will facilitate, the Flying Start for Queensland Children program.

***Flying Start for Queensland Children program*** is the Queensland Government program to transition Year 7 from the last year of primary schooling to the first year for secondary schooling.

***gross floor area (GFA)*** means the total floor area of all storeys of the building, including any mezzanines, (measured from the outside of the external walls and the centre of any common walls of the building), other than areas used for:

- building services; or
- a ground floor public lobby; or
- a public mall in a shopping complex; or
- parking, loading or manoeuvring of vehicles; or
- balconies, whether roofed or not.

***impervious area*** means an area within a site which does not allow natural infiltration of rain to the underlying soil and the majority of rainfall would become runoff e.g. roadways, car parks, footpaths, roofs, hardstand areas (sealed and unsealed), compacted areas etc.

***local government*** means Rockhampton Regional Council.

***local government areas*** means the former Fitzroy, Mount Morgan and Rockhampton Local Government areas.

***maximum adopted charge*** means the charge limit set out in the maximum charging framework established in the *Sustainable Planning Act 2009* and State planning regulatory provision (adopted charges).

***prescribed form*** means a form prescribed by the *local government*

***State planning regulatory provision (adopted charges)*** means the State planning regulatory provision (adopted charges) made under the *Sustainable Planning Act 2009*.

## Part 2 Application of the Resolution

### 2.1 Application to the local government area

The adopted infrastructure charge applies to the local government area other than for the following:

- (a) work or use of land authorised under the *Mineral Resources Act 1989*, the *Petroleum Act 1923*, the *Petroleum and Gas (Production and Safety) Act 2004* or the *Greenhouse Gas Storage Act 2009*; or
- (b) development in a priority development area under the *Economic Development Act 2012*.

### 2.2 Application to particular development

- (i) This resolution adopts a charge for particular development that is equal to or less than the *maximum adopted charge* and adopts different charges for particular development in different parts of the *local government area*.
- (ii) To enable the *adopted infrastructure charges schedule* identified in the *State planning regulatory provision (adopted charges)* to be applied to existing development use types, **Table 1** identifies the relationship between existing applicable local planning instruments use types and the classes of development to which the *adopted infrastructure schedule* apply.

**Table 1 – Planning scheme use types to which *adopted infrastructure charges schedule* apply.**

| Column 1<br>Use Category | Column 2<br>Development under the applicable local planning instruments      |   |   |
|--------------------------|--|---|---|
|                          | Rockhampton City<br>Plan 2005  | Mount Morgan<br>Shire Planning<br>Scheme 2003 | Fitzroy Shire Planning<br>Scheme 2005   |
|                          | Home occupation,<br>Market,<br>Park,<br>Telecommunication<br>facility/tower. | Park.   | Public facility –<br>operational,<br>Roadside stall,<br>Open space,<br>Public facility – other<br>(telecommunications<br>facilities). |

#### 2.4 Application to trunk infrastructure networks

The adopted infrastructure charge partly funds the establishment cost of the identified trunk infrastructure networks.

#### 2.5 Charge Areas

The charge areas for the calculation of an adopted infrastructure charge are identified on Maps 1 – 6, which can be found in Part 8 - Schedule of Maps.

### Part 3 Trunk Infrastructure Networks

#### 3.1 Trunk Infrastructure Identification and Establishment Costs

Until a priority infrastructure plan is adopted, this resolution identifies trunk infrastructure for the *local government area* and the establishment cost of the identified trunk infrastructure. Details regarding the trunk infrastructure can be found in Part 9 – Desired Standards of Service, Part 10 – Schedule of Plans for Identified Trunk Infrastructure and Part 11 – Schedule of Works for Identified Trunk Infrastructure.

### Part 4 Adopted Infrastructure Charge

#### 4.1 Purpose

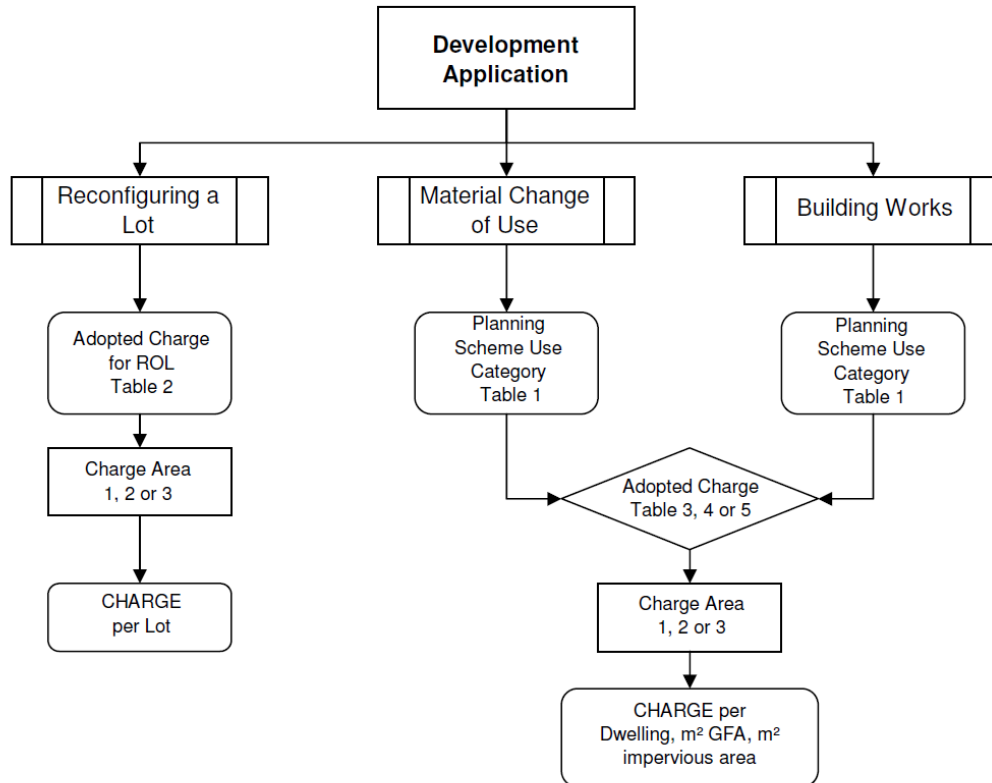

This section states the application of the adopted infrastructure charge to be levied by Rockhampton Regional Council under section 648F of the *Sustainable Planning Act 2009* for water supply, sewerage, transport, stormwater and parks and community lands networks.

#### 4.2 Adopted Charge

The adopted charge for:

- (i) **reconfiguring a lot**, is stated in **Table 2** – Adopted charge for reconfiguration of a lot;
- (ii) a **material change of use** or **carrying out building work** for:
  - (a) residential development is stated in **Table 3** – Adopted charge for residential development

- (b) accommodation (short and long term) is stated in **Table 4** – Adopted charge for accommodation (short and long term)
- (c) non-residential development other than a specialised use as stated in Table 1, is stated in **Table 5** – Adopted charge for non-residential development
- (iii) specialised uses or other uses not otherwise identified in Table 1 is to be the charge outlined in Table 5 (columns 3 and 4) for the Use Schedule (column 1) that the *local government* decides should apply for the use at the time of assessment.
- (iv) the adopted charge will be calculated on the approved use and at the time the decision is made, and will be recalculated at the time of payment.
- (v) (i) and (ii) above are diagrammatically depicted below.

### 4.3 Indexation

- (i) The adopted infrastructure charge levied by the *local government* is to be increased from the date the adopted infrastructure charge is levied to the time the charge is paid using the *consumer price index*.
- (ii) However, the adopted infrastructure charge payable is not to exceed the maximum adopted charge the *local government* could have levied for the development at the time the charge is paid.

**Table 2 – Adopted charge for reconfiguring a lot**

| <b>Column 1<br/>Charge Area</b> | <b>Column 2<br/>Adopted Infrastructure<br/>Charge (\$/lot)</b> | <b>Column 3<br/>Unit</b> |
|---------------------------------|--|--------------------------|
| Charge Area 1                   | 21,000   | per lot                  |
| Charge Area 2                   | 12,000   | per lot                  |
| Charge Area 3                   | 7,000  | per lot                  |

|                                      | Area 3                  | 12.50   | per m <sup>2</sup> of GFA | 0   | per m <sup>2</sup> of impervious area |
| High Impact Industry                 | Areas 1 & 2             | 70  | per m <sup>2</sup> of GFA | 10  | per m <sup>2</sup> of impervious area |
|                                      | Area 3                  | 17.50   | per m <sup>2</sup> of GFA | 0   | per m <sup>2</sup> of impervious area |
| Low Impact Rural                     | All Areas               | Nil Charge  |                           |   |                                       |
| High Impact Rural                    | All Areas               | 20  | per m <sup>2</sup> of GFA | Nil Charge  |                                       |
| Essential Services                   | Areas 1 & 2             | 140   | per m <sup>2</sup> of GFA | 10  | per m <sup>2</sup> of impervious area |
|                                      | Area 3                  | 35  | per m <sup>2</sup> of GFA | 0   | per m <sup>2</sup> of impervious area |
| Minor Uses                           | All Areas               | Nil Charge  |                           |   |                                       |
| Specialised Uses                     | All Areas               | Decided by the <i>local government</i> at time of assessment as per section 4.2 (iii) |                           |   |                                       |

\* Except an educational establishment for the Flying Start for Queensland Children program. An educational establishment for the Flying Start for Queensland Children program attracts a nil charge as per the State Planning Regulatory Provision (adopted charges) 2012 (SPRP)

## **Part 5 Administration of adopted infrastructure charge**

### **5.1 Purpose**

States how an adopted infrastructure charge levied by the *local government* is to be administered.

### **5.2 Calculation**

An adopted infrastructure charge that may be levied by the *local government* is calculated as follows:-

$$\text{TAIC} = [(\text{AIC} \times \text{U}) - (\text{C})] \times \text{I}$$

TAIC is the total adopted infrastructure charge that may be levied by the *local government*

AIC is the adopted infrastructure charge as identified in tables 2, 3, 4 and 5.

U is the unit of measure as identified in tables 2, 3, 4 and 5.

C is the agreed credit as set out in Part 6.

I is the indexation rate as outlined in section 4.3

### **5.3 Development subject to adopted infrastructure charge**

- (i) The *local government* may levy an adopted infrastructure charge on the following development:
  - (a) reconfiguring a lot
  - (b) a material change of use of premises
  - (c) carrying out building works
- (ii) If a development is subject to more than one use, the *local government* may levy an adopted infrastructure charge for development on the basis of the use with the highest potential demand.
- (iii) For an existing lawful use to which a development application is seeking to expand the gross floor area of the facility, the *adopted infrastructure charge* is only to be applied on the part of the development which is subject to intensification or extension.

### **5.4 Method of notification of an adopted infrastructure charge**

- (i) The *local government* is required to issue an adopted infrastructure charge notice stating:
  - (a) the amount of the charge;
  - (b) the land to which the charge applies;
  - (c) the person to whom the charge must be paid;
  - (d) when the charge is payable

- (ii) The adopted infrastructure charges notice may be given only in relation to a development approval or compliance permit.

#### **5.5 Time of payment of an adopted infrastructure charge**

An adopted infrastructure charge is payable at the following time:

- (i) if the charge applies to reconfiguring a lot that is assessable development or development requiring compliance assessment – before the *local government* approves the plan of subdivision for the reconfiguration; or
- (ii) if the charge applies to building work that is assessable development or development requiring compliance assessment – before the certificate of classification for the building work is issued; or
- (iii) if the charge applies to a material change of use – before the change happens; or
- (iv) otherwise – on the day stated in the adopted infrastructure charges notice or negotiated infrastructure charges notice.

#### **5.6 Alternatives to paying an adopted infrastructure charge**

- (i) The *local government* may enter into a written agreement about:
  - (a) whether the charge may be paid at a different time from that stated in the adopted infrastructure charges notice or negotiated adopted infrastructure charges notice;
  - (b) whether the charge may be paid by instalments;
  - (c) whether infrastructure may be supplied instead of paying all or part of the charge.
- (ii) The *local government* may, for development infrastructure that is land, give notice in addition to, or instead of an adopted infrastructure charges notice requiring:
  - (a) part of the land subject of the development application or compliance assessment, to be given to the *local government* in fee simple; or
  - (b) part of the land subject of the development application or compliance assessment, to be given to the *local government* in fee simple and part of an adopted infrastructure charge.

#### **5.7 Recording adopted infrastructure charges**

*Local Government* must record all levied adopted infrastructure charges in a publicly available adopted infrastructure charges register.

## 5.8 Proportional split of adopted infrastructure charges for trunk infrastructure networks

The adopted infrastructure charge is to be proportionally split to a trunk infrastructure network for the purposes of calculating charges, credits and offsets as stated in Table 6 (Proportional split of adopted infrastructure charge for trunk infrastructure networks).

**Table 6.1 – Residential and Reconfiguring a lot proportional split of adopted infrastructure charge for trunk infrastructure networks.**

| Column 1<br>Charge Area | Column 2<br>Proportional split of adopted infrastructure charge for trunk infrastructure networks (%) |       |           |            |       |
|-------------------------|---|-------|-----------|------------|-------|
|                         | Water   | Sewer | Transport | Stormwater | Parks |
| 1 and 2                 | 20  | 10    | 55        | 10         | 5     |
| 3*                      | 0   | 0     | 92        | 0          | 8     |

\*Note: the infrastructure networks for charge area 3 are based on the regional use of that network

**Table 6.2 – Non-Residential proportional split of adopted infrastructure charge for trunk infrastructure networks.**

| Column 1<br>Charge Area | Column 2<br>Proportional split of adopted infrastructure charge for trunk infrastructure networks (%) |       |           |       |
|-------------------------|---|-------|-----------|-------|
|                         | Water   | Sewer | Transport | Parks |
| 1 and 2                 | 22  | 11    | 61        | 6     |
| 3*                      | 0   | 0     | 92        | 8     |

\*Note: the infrastructure networks for charge area 3 are based on the regional use of that network

## Part 6 Credits

### 6.1 Definition of a Credit

- (i) A credit means the amount to be applied for the purpose of calculating an adopted infrastructure charge which takes into account existing land usage of the premises.
- (ii) The maximum value of a credit for each site will not exceed the adopted infrastructure charge for the approved land use of the existing site.

### 6.2 Application of a Credit

- (i) A credit will only be applied in respect of an existing lawful use in existence at the time the development application is made. This means an existing lawful use has to be established (up and running) at the time the development application is made.
- (ii) A credit will not be applied under any circumstance for unapproved use of the land.
- (iii) For any use, if a credit is higher than the adopted infrastructure charge of the approved use a refund will not occur.

## **Part 7    Offsets**

### **7.1    Purpose**

This section states the *local government's* policy for an infrastructure offset for a trunk infrastructure contribution (refer to section 3.1).

### **7.2    Application of section**

This section applies where, for a development, the *local government* has for a trunk infrastructure network:

- (i) required the following (*trunk infrastructure contribution*):
  - (a) the supply of work for trunk infrastructure in a condition of a development approval under section 649 (Conditions local governments may impose for necessary trunk infrastructure) of the *Sustainable Planning Act 2009*;
  - (b) the giving of part of the land the subject of a development application or request for compliance assessment in a notice given under section 648K(2) (Agreements about, and alternatives to, paying adopted infrastructure charge) of the *Sustainable Planning Act 2009* (land dedication notice); and
- (ii) levied an adopted infrastructure charge in an adopted infrastructure charges notice or negotiated infrastructure charges notice for the same premises under section 648F (Adopted infrastructure charges notice) of the *Sustainable Planning Act 2009*.

### **7.3    Claim for an infrastructure offset**

- (1) The person bound to provide the trunk infrastructure contribution and the adopted infrastructure charge for the development under the *Sustainable Planning Act 2009* (*claimant*) may give a notice in the prescribed form to the *local government* which states the following:
  - (i) that the claimant proposes to supply the trunk infrastructure contribution;
  - (ii) that the claimant seeks an offset for the supply of the trunk infrastructure contribution against an adopted infrastructure charge (*infrastructure offset*);
  - (iii) the claimants estimate of the following:
    - (a) the planned estimate of the trunk infrastructure contribution;
    - (b) the pre-market estimate of the trunk infrastructure contribution;
    - (c) the value of the infrastructure offset for the trunk infrastructure contribution.
- (2) The *local government* is to give a notice in the prescribed form to the claimant which states the following:

- (i) whether an infrastructure offset is applicable or not;
- (ii) if an infrastructure offset is not applicable, the reason;
- (iii) if an infrastructure offset is applicable, the value of the infrastructure offset.

#### **7.4 Calculation of an infrastructure offset**

- (1) The value of an infrastructure offset for trunk infrastructure which is:
  - (i) land, is the planned estimate of the land; and
  - (ii) work, is the lesser of the following:
    - (a) the planned estimate of the work specified by the *local government*.
    - (b) the pre-market estimate of the work required by the development;
- (2) The planned estimate of the of land or work specified by the *local government* is the net present value of the establishment cost of the trunk infrastructure contribution which is calculated having regard to the following:
  - (i) if the trunk infrastructure contribution is for the whole of an item of trunk infrastructure in the schedule of works for trunk infrastructure—the establishment cost of the trunk infrastructure in the schedule of works for trunk infrastructure;
  - (ii) if the trunk infrastructure contribution is for part of an item of trunk infrastructure in the schedule of works for trunk infrastructure—the proportion of the establishment cost of the trunk infrastructure in the schedule of works for trunk infrastructure applicable to the trunk infrastructure contribution having regard to the methodology specified by the *local government* for the calculation of the establishment cost in the schedule of works for trunk infrastructure;
  - (iii) if the trunk infrastructure contribution is not in the schedule of works for trunk infrastructure but the *local government* has determined that the land or work delivers the same desired standard of service to the trunk infrastructure in the schedule of works for trunk infrastructure—the methodology specified by the *local government* for the calculation of the establishment cost in the schedule of works for trunk infrastructure.
- (3) The pre-market estimate of the trunk infrastructure required by the development is the estimate expressed in dollars of the design and construction of the work required to service the development:
  - (i) including the following:
    - (a) the cost of planning and designing the work;
    - (b) the cost of survey and site inspection for the work;
    - (c) a cost under a construction contract for the work;
    - (d) a portable long service leave payment for a construction contract;

- (e) an insurance premium for the work;
- (f) a local government inspection fee for the commencement and end of the maintenance period for the work;
- (g) the cost of an approval for the work;

(ii) excluding the following:

- (a) a cost of carrying out temporary infrastructure;
- (b) a cost of carrying out non trunk infrastructure;
- (c) a cost of decommissioning, removal and rehabilitation of infrastructure identified in paragraphs (a) and (b);
- (d) a part of the trunk infrastructure contribution provided by the local government or a person other than the person seeking the infrastructure offset;
- (e) a cost to the extent that GST is payable and an input tax credit can be claimed for the work.

(4) The *local government* is to calculate the amount of the value of the infrastructure offset by indexing the value of the infrastructure offset from the date the notice is given under section 7.3(2) (Claim for an infrastructure offset) to the date that the infrastructure offset is to be offset against an infrastructure charge in accordance with the indexing as stated in section 4.3.

## **7.5 Application of an infrastructure offset**

The *local government* is to offset the amount of the value of an infrastructure offset against an adopted infrastructure charge for the trunk infrastructure network to which the trunk infrastructure contribution relates if the trunk infrastructure contribution is supplied for the development by the claimant in accordance with the applicable development approval and land dedication notice. The infrastructure offset is to be in accordance with section 5.8.

## **Part 8 Schedule of Maps**

|              |  |               |
|--------------|--|---------------|
| <b>Map 1</b> | <a href="#">Charge Area Map - Regional</a>     | February 2014 |
| <b>Map 2</b> | <a href="#">Charge Area Map - Rockhampton</a>  | February 2014 |
| <b>Map 3</b> | <a href="#">Charge Area Map - Gracemere</a>    | February 2014 |
| <b>Map 4</b> | <a href="#">Charge Area Map - Mount Morgan</a> | February 2014 |

## Part 9 Desired Standards of Service

Desired Standards of Service (DSS) direct the form and scale of infrastructure networks required to service development within the local government area. The performance of each network will be based on these standards which may vary over time. The DSS does not imply a guaranteed level of performance for the network but the level at which planning and development of the networks has been undertaken. Any entity does not have the right to expect or demand the standard.

DSS are expressed for each network in terms of planning and design criteria based on quantitative and qualitative standards.

**Planning** based criteria are generally qualitative and specify the types of outcomes envisaged by the supply of the infrastructure to the land uses contained in the Planning Scheme. These initially scope how the network is laid out to physically service land use and development outcomes. This may include hierarchies of densities of open space provision.

**Design** based criteria which are quantitative in nature and specify the size, capacity, operational performance (contained in the Network Design Documentation).

The following sections define the Desired Standards of Service for each trunk infrastructure network.

## 9.1 Water Supply Network Desired Standards of Service

- (1) The desired standards of service for the water supply system are detailed in Table 7.2.
- (2) Fitzroy River Water aims to provide reticulated potable water supply to the consumer to meet the demands imposed upon it by both the consumers and the fire fighting requirements.
- (3) It is acknowledged that in some cases, due to local circumstances, the desired standards of service may not be met. In these situations, water supply trunk infrastructure aims to meet the standards to the greatest degree practicable.

**Table 7.1 – Water Supply Network Design Criteria**

| Design criteria                          | Measure  |
|--|--|
| Average Day (AD) Demand                  | 500 litres per equivalent person per day (L/EP/Day)  |
| Maximum Day (MD) Demand                  | 1.9 x average day (AD)   |
| Maximum Hour (MH) Demand                 | 1/12 x maximum day (MD)  |
| One (1) equivalent tenement (ET)         | 2.7 equivalent persons (EP)  |
| Minimum service pressure                 | 22 metres head at the centroid of the residential lot during normal diurnal flow                   |
| Maximum service pressure                 | 50 metres head   |
| Fire fighting network pressure           | 12 metres minimum in the water supply network  |
| Fire flow for residential area           | 15 litres per second for a duration of two (2) hours at minimum pressure of 120 kilopascals (kPa)  |
| Fire flow for industrial/commercial area | 30 litres per second for a duration of four (4) hours at minimum pressure of 120 kilopascals (kPa) |
| Pipeline design maximum velocity         | two (2) metres per second  |
| Reservoir emergency capacity             | one (1) maximum day for the supply zone  |

**Table 7.2 – Water Supply Network Desired Standards of Service**

| Measure                          | Planning criteria<br>(qualitative standards)  | Design criteria<br>(quantitative standards)  |
|----------------------------------|---|--|
| Reliability/continuity of supply | The water supply system has been designed to provide water 24 hours a day 7 days a week, but under certain circumstances, FRW may need to interrupt or limit this service so that essential repair and maintenance work can be carried out. | <ul style="list-style-type: none"> <li>• Desired Environmental Outcome 12 – Rockhampton City Planning Scheme.</li> <li>• Section 3 and Table 3.1 FRW Strategic Asset Management Plan 24/11/2009.</li> <li>• Water Supply (Safety &amp; Reliability) Act</li> <li>• Compliance with the requirements of the System Leakage Management Plan for the Rockhampton Region.</li> <li>• Capricorn Municipal Development Guidelines</li> </ul> |
| Adequacy of supply               | The objective of the water supply system is to provide to the consumer a reticulated potable water supply to meet the demands imposed upon it by both   | <ul style="list-style-type: none"> <li>• Desired Environmental Outcome 12 – Rockhampton City Planning Scheme.</li> <li>• External Works and Servicing Code – Rockhampton City Planning</li> </ul>  |

| <b>Measure</b>                           | <b>Planning criteria<br/>(qualitative standards)</b>  | <b>Design criteria<br/>(quantitative standards)</b>   |
|--|---|---|
|  | the consumer and fire fighting requirements.  | Scheme. <ul style="list-style-type: none"> <li>• Capricorn Municipal Development Guidelines</li> <li>• Water Supply (Safety &amp; Reliability) Act</li> <li>• Compliance with the requirements of the System Leakage Management Plan for the Rockhampton Region.</li> </ul>   |
| Quality of supply                        | FRW will ensure that the water quality is generally in accordance with recognised standards that safeguards community health.               | <ul style="list-style-type: none"> <li>• Australian Drinking Water Quality Guidelines issued by the National Health and Medical Research Council.</li> <li>• Section 3 Table 3.2 FRW Strategic Asset Management Plan 24/11/2009.</li> </ul>   |
| Environmental impacts                    | The environmental impacts of the water supply network are minimised in accordance with community expectations.                              | <ul style="list-style-type: none"> <li>• Desired Environmental Outcome 12 – Rockhampton City Planning Scheme.</li> <li>• Compliance with the requirements of the Environmental Protection Act 1994</li> <li>• Water Supply (Safety &amp; Reliability) Act</li> </ul>  |
| Pressure and leakage management          | The water supply network is monitored and managed to maintain the reliability and adequacy of supply and to minimise environmental impacts. | <ul style="list-style-type: none"> <li>• Desired Environmental Outcome 12 – Rockhampton City Planning Scheme.</li> <li>• Compliance with the requirements of the System Leakage Management Plan for the Rockhampton Region.</li> <li>• Water Supply (Safety &amp; Reliability) Act.</li> </ul>                                |
| Infrastructure design/planning standards | Design of the water supply network will comply with established guidelines, codes and standards.  | <ul style="list-style-type: none"> <li>• Capricorn Municipal Development Guidelines – Design Specifications and Standard Drawings.</li> <li>• Water Reticulation Code of Australia WSA 03-1999.</li> <li>• Department of Natural Resources and Mines Planning Guidelines for Water Supply and Sewerage March 2005.</li> </ul> |

## 9.2 Sewerage Network Desired Standards of Service

- (1) The desired standards of service for the sewerage system are detailed in Table 8.3 below.
- (2) Fitzroy River Water aims to provide reticulated sewerage to the consumer to meet the demands imposed upon it by the consumers and the Environmental Protection Agency.
- (3) The objective of the sewerage system is to transport sewage from domestic, commercial and industrial properties using gravity flow pipes and where this is uneconomical, by pumping to the treatment plant.
- (4) It is acknowledged that in some cases, due to local circumstances, the desired standards of service may not be met. In these situations, sewerage trunk infrastructure aims to meet the standards to the greatest degree practicable.

**Table 8.1 – Wastewater Network Design Criteria**

| Design criteria   | Measure   |
|---|---|
| One (1) equivalent person (EP)                                | 200 litres per equivalent person per day (L/EP/day)   |
| One (1) equivalent tenement (ET)                              | 2.7 equivalent person (EP)                            |
| Average Dry Weather Flow (ADWF)                               | 540 litres per equivalent tenement per day (L/ET/day) |
| Peak Dry Weather Flow (PDWF)                                  | 2.5 x Average Dry Weather Flow (ADWF)                 |
| Wet Weather Flow (WWF)  | five (5) x Average Dry Weather Flow (ADWF)            |
| Sewage pump station emergency storage                         | four (4) hours minimum                                |
| Total sewage pump station capacity                            | five (5) x Average Dry Weather Flow (ADWF) minimum    |
| Gravity Main Minimum velocity at peak dry weather flow (PDWF) | 0.75 metres per second                                |
| Gravity Main Maximum velocity at wet weather flow (WWF)       | two (2) metres per second                             |
| Rising main minimum scouring velocity                         | 0.75 metres per second                                |
| Rising main maximum velocity                                  | two (2) metres per second                             |

**Table 8.2 – Treated Water Quality**

| Criteria                       | Measure                             |
|--------------------------------|-------------------------------------|
| Biological Oxygen Demand (BOD) | less than 20 milligrams per litre   |
| Dissolved Oxygen (DO)          | greater than 6 milligrams per litre |
| Suspended Solids (SS)          | less than 30 milligrams per litre   |
| pH                             | 6.5 – 7.5                           |
| Free chlorine residual         | less than 0.7 milligrams per litre  |

**Table 8.3 – Sewerage Network Desired Standards of Service**

| Infrastructure design / planning standards | Design of the sewerage network will comply with the established guidelines, codes and standards.   | <ul style="list-style-type: none"> <li>• Capricorn Municipal Development Guidelines – Design Specifications and Standard Drawings.</li> <li>• Sewerage Reticulation Code of Australia WSA 03-1999.</li> <li>• Department of Natural Resources and Mines Planning Guidelines for Water Supply and Sewerage March 2005.</li> <li>• Water Supply (Safety &amp; Reliability) Act</li> </ul> |

### 9.3 Transport Network Desired Standards of Service

The transport network contains three integrated systems of:

- (1) Roads
  - (a) the desired standards of service for roads are largely dependent on the road hierarchy classification, lanes, traffic loading, traffic pattern and level of service (LOS) (shown in Table 10); and
  - (b) the desired standards of service apply to all trunk infrastructure roads within the Rockhampton Regional Council area in accordance with Table 9.
- (2) Public transport
  - (a) bus facilities to include bus stopping treatments and shelters in accordance with Table 9.
- (3) Pedestrian and cycle network
  - (a) desired standards of service for cycleways and pedestrian pathways concern geometric design considerations required for the construction of trunk infrastructure as defined by on-road and off-road facilities identified in the Capricorn Municipal Development Guidelines, and summarised in Table 9 below.

It is acknowledged that in some cases, due to local circumstances, the desired standards of service may not be met. In these situations, transport trunk infrastructure aims to meet the standards to the greatest degree practicable.

**Table 9 – Transport Network Desired Standards of Service**

| Measure                                | Planning criteria<br>(qualitative standards)   | Design criteria<br>(quantitative standards)  |
|--|--|--|
| Road network design/planning standards | <p>The road network provides a functional urban and rural hierarchy that supports settlement patterns, commercial and economic activities, and freight movement.</p> <p>Design of the road system aims to meet minimum Level of Service (LOS) D at the Planning Horizon Peak Hour Pattern for the particular site.</p> | <ul style="list-style-type: none"> <li>• Local government road design and development manual/standards/codes in planning scheme, planning scheme policy and <i>Capricorn Municipal Development Guidelines</i>;</li> <li>• The Queensland Department of Transport and Main Roads <i>Road Planning and Design Manual</i> ;</li> <li>• Australian Standards;</li> <li>• AUSTRROADS guides;</li> <li>• Maximum acceptable degree of saturation for intersections identified in Table 11 or minimum LOS D in Table 10; and</li> <li>• Level of Service (LOS) – Table 10.</li> </ul> |

| Measure  | Planning criteria<br>(qualitative standards)  | Design criteria<br>(quantitative standards)   |
|--|---|---|
| Public Transport design/planning standards     | <p>Ensure development accommodates the access to and integration of public transport services.</p> <p>Provide bus stops including bus bays, shelters, seating and bus information systems in accordance with Council's adopted standards identified in the planning scheme.</p> | <ul style="list-style-type: none"> <li>• Local government road design and development manual/standards/codes in planning scheme, planning scheme policy and <i>Capricorn Municipal Development Guidelines</i>;</li> <li>• Design accords with the performance criteria set by Department of Transport and Main Roads;</li> <li>• Queensland Government TRANSLINK <i>Public transport infrastructure manual</i></li> <li>• AUSTRROADS guides for road-based public transport and high-occupancy vehicles.</li> </ul> |

| <b>Road Network Item</b>           | <b>Maximum degree of saturation</b> |
|------------------------------------|-------------------------------------|
| Traffic Signals                    | 0.9                                 |
| Roundabout                         | 0.85                                |
| Priority controlled                | 0.8                                 |
| Traffic signals (State-controlled) | 0.9                                 |

## 9.4 Stormwater Network Desired Standards of Service

The function of Council's stormwater drainage systems is to collect and convey stormwater through respective catchment areas with minimal nuisance, danger or damage, at a cost that is acceptable to the community.

It is acknowledged that in some cases, due to local circumstances, the desired standards of service may not be met. In these situations, stormwater trunk infrastructure aims to meet the standards to the greatest degree practicable.

The Defined Flood Event (DFE) and Defined Flood Level (DFL) are defined in the Planning Scheme and Policies.

Table 4.5.4.1 outlines the planning and design criteria for the stormwater network within the Rockhampton Regional Council area. Some significant design parameters are as follows:

- (1) Major and Minor System Criteria are required.
- (2) Q100 (AEP 1% or ARI 100) for all Major Systems, Q5 for residential and Q10 for industrial Minor Systems.
- (3) Building level freeboard not less than 300 millimetres above DFE level.

**Table 12 – Stormwater Network Desired Standards of Service**

| Measure  | Planning criteria<br>(qualitative standards)   | Design criteria<br>(quantitative standards)  |
|----------|--|--|
| Quantity | Collect and convey stormwater in natural and engineered channels, a piped, drainage network and system of overland flow paths to a lawful point of discharge, in a safe manner that minimises the inundation of habitable rooms and protects life. | <ul style="list-style-type: none"> <li>• <i>Queensland Urban Drainage Manual</i></li> <li>• Local government standards in planning scheme, planning scheme policy and <i>Capricorn Municipal Development Guidelines</i>;</li> </ul>  |
| Quality  | The water quality of urban catchments and waterways is managed to protect and enhance environmental values and pose no health risk to the community.   | <ul style="list-style-type: none"> <li>• Local water quality guidelines prepared in accordance with the National Water Quality Management Strategy;</li> <li>• <i>Queensland Water Quality Guidelines 2009</i> — Environmental Protection Agency (EPA)</li> <li>• <i>National Water Quality Guidelines</i> — National Water Quality Management Strategy</li> </ul> |

| <b>Measure</b>                           | <b>Planning criteria<br/>(qualitative standards)</b>   | <b>Design criteria<br/>(quantitative standards)</b>  |
|--|--|--|
| Environmental Impacts                    | Where appropriate, adopt water-sensitive urban design principles and on-site water quality management to achieve EPA water quality objectives. | <ul style="list-style-type: none"> <li>• Local government standards/codes in planning scheme, planning scheme policy and <i>Capricorn Municipal Development Guidelines</i>;</li> <li>• Environmental Protection [Water] Policy 1997)</li> </ul>                                  |
| Infrastructure design/planning standards | Design of the stormwater network will comply with established codes and standards.   | <ul style="list-style-type: none"> <li>• <i>Queensland Urban Drainage Manual</i></li> <li>• Local government standards in planning scheme, planning scheme policy and <i>Capricorn Municipal Development Guidelines</i>;</li> <li>• Natural Channel Design Guidelines</li> </ul> |

## 9.5 Public Parks and Land for Community Facilities Network Desired Standards of Service

The desired standards of service for the public parks and land for community facilities trunk infrastructure are shown in tables 13 to 18 and should be read in conjunction with Councils adopted technical standards – Capricorn Municipal Development Guidelines.

It is acknowledged that in some cases, due to local circumstances, the desired standards of service may not be met. In these situations, public parks and land for community facilities trunk infrastructure aims to meet the standards to the greatest degree practicable.

**Table 13 – Public Parks and Land for Community Facilities Network Desired Standards of Service**

| <b>Measure</b>   | <b>Planning criteria<br/>(qualitative standards)</b>  | <b>Design criteria<br/>(quantitative standards)</b>  |
|--|---|--|
| Functional network   | A network of parks and community land is established to provide for the full range of recreational and sporting activities and pursuits.  | <ul style="list-style-type: none"> <li>• Parks and community land are provided at a local, district and local government area wide level.</li> <li>• Parks and community land address the needs of both recreation and sport.</li> </ul>                       |
| Accessibility  | <p>Public parks and land for community facilities will be located to ensure adequate pedestrian, cycle and vehicle access.</p> <p>Collocate land for multi-purpose community facilities with parks and recreation land and commercial/retail centres.</p>   | <ul style="list-style-type: none"> <li>• 2,000 square metres of land for community facilities is to be provided when such land is co-located with a district and regional park.</li> <li>• Accessibility standards are identified in table 4.5.5.3.</li> </ul> |
| <ul style="list-style-type: none"> <li>• Land quality/suitability</li> <li>• Area/1,000 persons</li> <li>• Minimum size</li> <li>• Shape of land</li> <li>• Minimum desired flood immunity</li> <li>• Maximum desired grade</li> <li>• Road frontage and visibility</li> </ul> | Public parks and land for community facilities will be provided to a standard that supports a diverse range of recreational, sporting, community and health–promoting activities to meet community expectations. This includes ensuring land is of an appropriate size, configuration and slope, and has an acceptable level of flood immunity. | The rate of land provision is identified in table 4.5.5.2. The minimum size, shape of land, minimum desired flood immunity, maximum desired grade and road frontage and visibility for land is identified in table 4.5.5.4.                                    |
| Facilities/embellishments  | Public parks and land for community facilities contain a range of embellishments to complement the type and purpose of the park.  | Indicative embellishments for each type of park, land for community facilities and sports grounds are identified in tables 4.5.5.5 and 4.5.5.6.  |
| Infrastructure design/performance standards  | Maximise opportunities to collocate recreational parks and land for community facilities in proximity to other community infrastructure, transport hubs and valued environmental and cultural assets.   | Local government standards in the planning scheme and planning scheme policies Australian Standards.   |

**Table 14 – Rate of Land Provision**

| Infrastructure type           | Rate of provision (hectare per 1,000 people)   |   |
|-------------------------------|--|---|
|                               | District   | Local government wide   |
| Recreation park               | 0.8  | 0.5   |
| Sports ground                 | 2.5  | 2.5   |
| Land for community facilities | Rate of provision to be determined by minimum land sizes and at least one (1) district facility per the following planning sectors: <ul style="list-style-type: none"> <li>• North Rockhampton</li> <li>• South Rockhampton</li> <li>• Gracemere.</li> </ul> | Rate of provision to be determined by minimum land sizes and at least one (1) regional facility per the following planning sectors: <ul style="list-style-type: none"> <li>• North Rockhampton</li> <li>• South Rockhampton.</li> </ul> |

**Table 15 – Accessibility Standard**

| Infrastructure type           | Accessibility standard (kilometres)   |   |
|-------------------------------|---|---|
|                               | District  | Local government wide   |
| Recreation park               | 2.5 kilometres in urban areas and within 500 metres of a public transport pick up/drop off point. | Local government area and within 500 metres of a public transport pick up/drop off point. |
| Sports ground                 | 2.5 kilometres in urban areas and within 500 metres of a public transport pick up/drop off point. | Local government area and within 500 metres of a public transport pick up/drop off point. |
| Land for community facilities | Within 800 metres of a public transport pick up/drop off point.                                   | Within 500 metres of a public transport pick up/drop off point.                           |

**Table 16 – Public Parks and Land for Community Facilities Characteristics**

| Characteristic                           | Recreation parks and land for community facilities   |  | Sports grounds  |   |
|--|--|--|---|---|
|  | District   | Regional   | District  | Regional  |
| Minimum size of open space (hectares)    | Two (2) hectares of usable space for parkland  | Six (6) hectares of usable space for parkland  | A minimum of three (3) hectares, sufficient to boast two (2) fields per one (1) oval collocating and room for ancillary facilities (club house, toilets, car parking) | A minimum of four (4) hectares, sufficient to boast three (3) fields per two (2) ovals collocating and room for ancillary facilities (club house, toilets, car parking) |
|  | One (1) hectare of usable space for land for community facilities  | 1.5 hectares of usable space for land for community facilities   |   |   |
| Shape of land                            | The preferred shape for a park/land for community facilities is square to rectangular with the sides no greater than 2:1   |  | To maximise the area available for playing fields, a square or rectangular shape is considered most efficient   |   |
| Minimum desired flood immunity for parks | At least twenty-five (25) per cent of total area above Q50 with main activity area/s above Q100  | At least fifty (50) per cent of total area above Q50 with main activity area/s above Q100 and free of hazards  | Free of hazards. Ninety per cent of land above Q20. Fields/courts above Q50. Built facilities above Q100  |   |
| Maximum desired grade                    | <p>Recreation parks — average grade of 1:14 for eighty (80) per cent of the area of the park to facilitate wheelchair access to parks. Variable topography is satisfactory for the remaining area. No area of the park will have a grade greater than 1:6</p> <p>Community facilities — a maximum grade of no more than six (6) per cent for the entirety of the site or ten (10) per cent for the footprint of the community facility</p> | <p>Recreation parks — average grade of 1:20 for main use areas, 1:50 for kick about area, and variable topography for remainder. No area of the park will have a grade greater than 1:6</p> <p>Community facilities — a maximum grade of no more than six (6) per cent for the entirety of the site or ten (10) per cent for the footprint of the community facility</p> | Laser levelling to a maximum gradient of playing surface 1:100  |   |
| Road frontage and visibility             | Twenty-five (25) per cent of park perimeter to have direct road frontage, preferably on a collector road   | Fifty (50) per cent of park perimeter to have direct road frontage, preferably on a collector road   | Twenty-five (25) per cent of the ground perimeter to have direct road frontage  |   |

**Table 17 – Indicative embellishments for the hierarchy of Recreation Parks**

| Embellishment                                    | Recreation parks   |  |
|--|--|--|
|  | District   | Local government-wide  |
| Internal roads                                   | None   | As required to service car parking and access requirements   |
| Car parking                                      | Forty (40) sealed car parks  | Minimum of 120 sealed car parks  |
| Fencing/bollards, lock rail                      | Fencing/bollards along road frontages and including a lock rail  | Fencing/bollards along road frontages and including a lock rail  |
| Lighting   | Lighting to all roadways, parking, picnic nodes and primary pedestrian paths   | Lighting to all roadways, parking, picnic nodes and primary pedestrian paths   |
| Toilets/public amenities                         | One (1) toilet (location to be determined in consultation with Council)  | Two (2) toilets (location to be determined in consultation with Council)   |
| Pedestrian pathway access network                | 2.2 metre wide concrete shared pedestrian and cycle path through and around park connecting to adjacent pathways   | Entrance and access paths. Concrete shared pedestrian and cycle path (minimum 2.2 metre wide generally and minimum 3.5 metre wide in key, high use areas) connecting to adjacent pathways  |
| Bench seating                                    | Minimum of four (4), located for supervision of any play area (if not otherwise serviced by sheltered tables), and/or along recreation corridors/pedestrian pathways to provide rest stops                     | As determined in consultation with Council. Located for: <ul style="list-style-type: none"> <li>• supervision of any play area (if not otherwise serviced by sheltered tables); and</li> <li>• along recreation corridors/pedestrian pathways to provide rest stops; and/or</li> <li>• enjoyment of views/amenity</li> </ul> |
| Shade structures or trees (over playgrounds)     | Yes  | Yes  |
| Shelters/gazebo with tables and seating and bins | Minimum of six (6) shaded tables, seating and bins   | Minimum of fifteen (15) shaded tables, seating and bins (further provision to be determined in consultation with Council)  |
| Tap/bubbler                                      | Three (3) drinking fountain/bubbler and taps   | Ten (10) drinking fountain/bubbler and taps  |
| Barbeques  | Three (3) barbeques  | Ten (10) barbeques (to be determined in consultation with Council – provision may consist of multiple double barbecues located to service picnic nodes for individuals, families and large groups)   |
| Rubbish bins                                     | As required to service activity areas, picnic nodes, key access/egress areas and pathway systems   | As required to service activity areas, picnic nodes, key access/egress areas and pathway systems   |
| Landscaping and turfing                          | Shade trees, landscaping and turfing to enhance amenity (determined in consultation with Council)  | Shade trees, landscaping and turfing to enhance amenity (determined in consultation with Council)  |
| Signage  | Park identification and way finding signage, located at key entrances. Optional — interpretive signage (for nature appreciation areas) or trail signage (for example distance markers on recreation corridors) | Park identification and way finding signage, located at key entrances. Optional — interpretive signage and/or trail signage (for example distance markers on recreation corridors). Signage theme reflecting key features of the park  |

| Embellishment             | Recreation parks   |   |
|---------------------------|--|---|
|                           | District   | Local government-wide   |
| Recreation activity areas | Mix of ten (10) recreation activity areas, clustered in two or more nodes (for example mix of toddlers, children, youth, picnic and barbecue area, dog off-leash, skate park, meeting area, older adults, pathway systems) | Mix of fifteen (15) recreation activity areas dispersed across well defined nodes of activity focus (for example a mix of toddlers, children, youth, older adults, major picnic and barbecue area, dog off-leash, skate park, meeting areas, trail network, event area, nature appreciation area) |
| Irrigation                | In identified high use areas   | In identified high use areas  |
| Bike racks                | Three (3) bike racks for a minimum of fifteen (15) bikes   | Bike racks for a minimum of thirty (30) bikes   |
| Bus pull-through          | No   | Yes (location to be determined in consultation with Council)  |
| Bus parking               | No   | Yes (location to be determined in consultation with Council)  |

**Table 18 – Indicative embellishments for the hierarchy of Sport Parks**

| Park element            | Embellishment details  |  |
|-------------------------|--|--|
|                         | District   | Local government-wide  |
| Courts/fields           | As a minimum, two (2) rectangular fields and capacity for additional facilities/courts (as determined in consultation with Council)<br><br>Sports grounds and facilities meet accepted standards including dimensions, playing surface and subsurface drainage | As a minimum, three (3) rectangular fields and capacity for additional facilities/courts (as determined in consultation with Council)<br><br>Sports grounds and facilities meet accepted standards including dimensions, playing surface and subsurface drainage |
| Goal posts/line marking | According to accepted standards  | According to accepted standards  |
| Irrigation              | Main field as a minimum (to be determined in consultation with Council)  | Two (2) main fields as a minimum (to be determined in consultation with Council)   |
| Field/court lighting    | Lighting for night sports  | Lighting for night sports  |
| Spectator seating       | 100 seats and earth mounds (determined in consultation with Council)   | 150 seats and earth mounds (determined in consultation with Council)   |
| Tap/bubbler             | Four (4) drink bubblers and taps located near activity areas and canteen/clubhouse area  | Eight (8) drink bubblers and taps located near activity areas and canteen/clubhouse area   |
| Sports clubhouse        | Minimum of one (1) (exact provision to be determined in consultation with Council) including a toilet/change room, canteen, storage and administrative/office space  | Minimum of two (2) (exact provision to be determined in consultation with Council) including a toilet/change room, canteen, storage and administrative/office space  |
| Landscaping and turfing | Trees/shade provision for spectators, landscaping of boundaries to buffer noise/light spill to any surrounding properties  | Trees/shade provision for spectators, landscaping of boundaries to buffer noise/light spill to any surrounding properties  |

| Park element  | Embellishment details   |  |
|---|---|--|
|   | District  | Local government-wide  |
| Feature paving/concrete stencilling   | Located at key entry areas or high use zones (to be determined in consultation with Council)                            | Located at key entry areas or high use zones (to be determined in consultation with Council)                           |
| Internal roads  | Yes   | Yes  |
| Bus pull-through  | Yes   | Yes  |
| Bus parking   | Yes   | Yes  |
| Car parking   | Minimum of sixty (60) sealed spaces for a two (2) field complex or twelve (12) per court                                | Minimum of 100 sealed spaces for a three (3) field complex or twelve (12) per court                                    |
| Bike racks  | Bike racks for a minimum of thirty (30) bikes   | Bike racks for a minimum of fifty (50) bikes   |
| Fencing/bollards, lock rail   | Fencing/bollards along road frontages and including a lock rail   | Fencing/bollards along road frontages and including a lock rail  |
| Security Lighting   | Security lighting to all roadways, parking, picnic nodes and primary pedestrian paths                                   | Security lighting to all roadways, parking, picnic nodes and primary pedestrian paths                                  |
| Pedestrian pathway access network   | Entrance and access paths, walking/cycling network. Minimum 2.2 metre wide concrete shared pedestrian and cycle path    | Entrance and access paths, walking/cycling network. Minimum 2.2 metre wide concrete shared pedestrian and cycle path   |
| Public artwork  | To be determined in consultation with Council   | To be determined in consultation with Council  |
| Signage   | Park identification and way finding signage, located at key entrances   | Park identification and way finding signage, located at key entrances  |
| Recreation activity areas (for example play spaces, fitness circuits, hit up walls) | Mix of three (3) recreation activity areas (for example play spaces, fitness circuits, half courts, free to use courts) | Mix of five (5) recreation activity areas (for example play spaces, fitness circuits, half courts, free to use courts) |
