### 8 OFFICERS' REPORTS

#### 8.1 SPONSORSHIP AND CO-HOSTING OF THE WIOA QUEENSLAND WATER INDUSTRY OPERATIONS CONFERENCE

| File No:             | 1466  |
|----------------------|---|
| Attachments:         | Nil   |
| Authorising Officer: | Robert Holmes - General Manager Regional Services |
| Author:              | Jason Plumb - Acting Manager Fitzroy River Water  |

#### SUMMARY

Water Industry Operations Australia (WIOA) is an incorporated association that is dedicated to promoting and supporting the water industry sector in Australia with a specific focus on promoting excellence within the water industry. WIOA has recently contacted Fitzroy River Water (FRW) to request that FRW co-host and sponsor the Queensland conference planned for 1-2 June 2016. FRW has worked previously with WIOA to co-host two previous conferences in Rockhampton and has a long history of membership with this leading industry sector group. This request from WIOA is a reflection of the previous interactions between the two organisations and also place as a leading regional water service provider in both Queensland and across Australia.

#### OFFICER'S RECOMMENDATION

THAT Council approve FRW co-hosting the WIOA Queensland Water Industry Operations Conference to be held in Rockhampton on 1-2 June 2016, and the provision of sponsorship through the contribution of \$10,000 to the conference organisers.

#### BACKGROUND

The Water Industry Operations Australia (WIOA) is a leading group within Australia for the support and promotion of all aspects of water and sewerage operations and maintenance. WIOA was established in 2001 from a smaller group based in Victoria which was first founded in 1973. The objectives of WIOA are to, promote the standards of education and training within the water sector, preserve clean waterways, protect public and environmental health and accumulate and distribute information on all aspects of the water industry. WIOA achieves these objectives by working closely with government and non-government agencies, maintaining a strong industry-based membership, and holding numerous meetings and conferences to facilitate the sharing of information within the water industry sector.

WIOA has previously held conferences in Rockhampton in 2006 and again in 2010. FRW was represented at each of these conferences with presentations given by FRW officers. The unique characteristics of the Fitzroy River and its associated water quality have been the topics of presentations provided by FRW officers. FRW also played a role in assisting with the organisation and hosting of these events. These previous conferences were successful events that provided the opportunity for FRW to promote its water and sewerage operations to its peers and also learn from the experience of others in the industry.

In recent years, FRW has been a leading water service provider at a national level with respect to low operating costs and low pricing. As such, other water service providers are typically always interested in understanding how FRW does business and how FRW continues to maintain low operating costs whilst maintaining a high value service to the community. The upcoming conference in June will give FRW the opportunity to promote these important attributes but also to present information on some of the recent capital upgrade project highlights (e.g. \$9.3 million Glenmore High Lift Water Pump Station upgrade). Also, the holding of the conference locally provides the ability for numerous FRW staff to attend a leading industry conference at little to no cost. FRW has been invited by WIOA to co-host and sponsor the next Queensland conference in Rockhampton in June.

#### **BUDGET IMPLICATIONS**

WIOA has advised FRW that a contribution of \$10,000 is required to secure FRW's sponsoring and co-hosting of the conference event in June 2016. The 2015-16 Council Budget contains allocations for professional and technical expenses as well as conference attendance that can be used to cover this expenditure. Other than this up-front contribution, other minor in-kind contributions would be expected with all other conferences expenses to be covered by WIOA.

#### CONCLUSION

The 2016 WIOA Queensland Water Industry Operations Conference is being held in Rockhampton on 1-2 June. This conference is a good opportunity for FRW to engage with local, state and national water service providers and other industry representatives to promote the high standard of water and sewerage services that we offer to the community. FRW therefore recommends that Council support FRW sponsoring and co-hosting this event.

### 9 STRATEGIC REPORTS

#### 9.1 FRW MONTHLY OPERATIONS AND ANNUAL PERFORMANCE PLAN REPORT AS AT 31 DECEMBER 2015

| File No:             | 1466  |  |  |  |

| Author:              | Jason Plumb - Acting Manager Fitzroy River Water                                |  |  |  |

#### SUMMARY

The Monthly Operations and Annual Performance Plan Report for Fitzroy River Water (FRW) as at 31 December 2015 are presented for Councillors information.

#### OFFICER'S RECOMMENDATION

THAT the FRW Monthly Operations Report and Annual Performance Plan quarterly report as at 31 December 2015 be received.

#### COMMENTARY

The Monthly Operations and Annual Performance Plan Report for FRW of the Regional Services Department are attached for Council's consideration.

FRW report to various external agencies and stakeholders, the data in these reports is presented based on water and sewerage schemes. The format of reporting actual non-financial performance against targets in accordance with the requirements of the Annual Performance Plan has been modified to be consistent with the external reporting requirements and is presented in Attachment 2.

#### **RISK ASSESSMENT**

Quarterly risk reviews and reporting requirements have been undertaken.

#### CONCLUSION

Business performance is as expected for this quarter and this report serves two purposes – keeping the Council informed and meeting the legislative obligation of reporting on progress against the FRW Performance Plan.

# FRW MONTHLY OPERATIONS AND ANNUAL PERFORMANCE PLAN REPORT AS AT 31 DECEMBER 2015

# FRW Monthly Operations and Annual Performance Plan as at 31 December 2015

Meeting Date: 3 February 2016

Attachment No: 1

# MONTHLY OPERATIONS REPORT

# FITZROY RIVER WATER

## Period Ended 31 December 2015

#### VARIATIONS, ISSUES AND INNOVATIONS

#### Manager's Overview

Fitzroy River Water's performance remained consistent through the 2nd quarter and focus continues on staff safety, improving reliability and quality of services provided to customers and compliance with Queensland legislation and Australian guideline obligations. Particular attention is being given to the Capital program to ensure timely delivery of projects. A number of significant multi-year capital projects are now approaching completion (e.g. Glenmore High Lift Water Pump Station Upgrade).

#### Innovations

Nil.

#### Improvements / Deterioration in Levels of Services or Cost Drivers

Recently a tender was awarded to JM Kelly Pty Ltd for the construction of a new sewer main across Moores Creek to replace the previous sewer main that was destroyed during the flash-flooding associated with the Tropical Cyclone Marcia event. The new sewer crossing has been re-designed to be significantly more resistant to a similar event in future with a number of changes incorporated into the design. The construction work is already underway and is expected to be completed between May and June, weather permitting, at a cost of approximately \$600,000.

#### Variations / Concerns

The recent quarter has seen continued dry weather with below average rainfall received throughout out most of the region. The storage level in the Mount Morgan No. 7 Dam is now at its lowest level in more than 5 years, but is still above the trigger for the implementation of water restrictions. The receipt of significant summer rainfall is required to replenish this storage. The Fitzroy Barrage storage is currently at 91% of full storage capacity.

#### LINKAGES TO OPERATIONAL PLAN

#### 1. COMPLIANCE WITH CUSTOMER SERVICE REQUESTS

The response times for completing the predominant customer requests in the reporting period for 31 December 2015 are as below:

|  | Balance B/F |                                |          | ionth NEW<br>Jests | TOTAL                             |        | Under                      | Avg W/O                           | Completion         | Avg                                      | Avg                                   | Avg                                    | Avg                                  |      | Avg                       |

#### Comments and Additional Information

FRW uses Pathway escalations to monitor service performance compliance to the Customer Service Standards. The last column is the best indicator of average completion times for standard jobs.

#### 2. <u>COMPLIANCE WITH STATUTORY AND REGULATORY REQUIREMENTS</u> INCLUDING SAFETY, RISK AND OTHER LEGISLATIVE MATTERS

#### Safety Statistics

The safety statistics for the reporting period are:

|  | SECOND QUARTER 2015/16    |   |   |  |  |  |  |
|--|---------------------------|---|---|--|--|--|--|
|  | October November December |   |   |  |  |  |  |
| Number of Lost Time Injuries               | 1                         | 0 | 0 |  |  |  |  |
| Number of Days Lost Due to Injury          | 2                         | 0 | 0 |  |  |  |  |
| Total Number of Incidents Reported         | 1                         | 1 | 2 |  |  |  |  |
| Number of Incomplete Hazard<br>Inspections | 4                         | 3 | 3 |  |  |  |  |

Hazard inspections are being completed however FRW processing of any rectification actions can delay meeting the end of month cut-off date for HR reporting.

#### Treatment and Supply

- No lost time injuries for the month.
- No employees are currently on long term lost time injuries.
- One safety incident was reported for the month. A minor electric shock was sustained by an employee when touching a light switch.

#### Network Services

- No lost time injuries for the month.
- No employees are currently on long term lost time injuries.
- Two safety incidents were reported for the month.

#### **Operations and Planning**

- No lost time injuries for the month.
- No employees are currently on long term lost time injuries.
- One safety incident was reported for the month. A contractor carrying out access chamber refurbishment sustained a small cut to his hand.

#### **Risk Management Summary**

| Potential Risk  | Current<br>Risk<br>Rating | Future Control<br>& Risk<br>Treatment<br>Plans   | Due Date | %<br>Completed | Comments   |

\*\*Where there are no targets identified they will be set as part of the revised FRW Customer Service Standards.

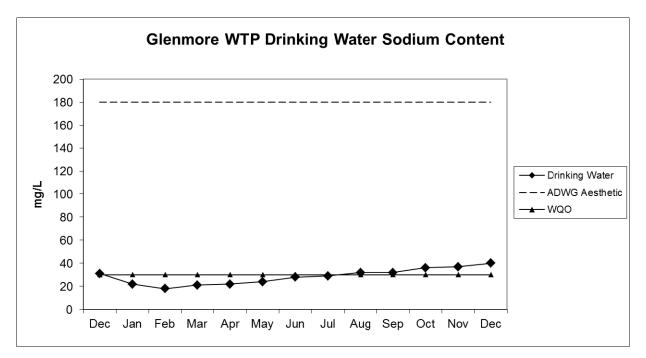

Refer to the individual graphs and information below.

#### TREATMENT AND SUPPLY

Drinking Water E.C. and Sodium Content

The level of E.C. in drinking water supplied from the Glenmore Water Treatment Plant (GWTP) during December increased slightly to be 470  $\mu$ S/cm. The level of E.C. is now greater than the Water Quality Objective of 400  $\mu$ S/cm but well beneath the previously used aesthetic guideline value of 1000  $\mu$ S/cm. The E.C. reading is expected to continue to increase gradually before the receipt of normal wet season rainfall within the next few months.

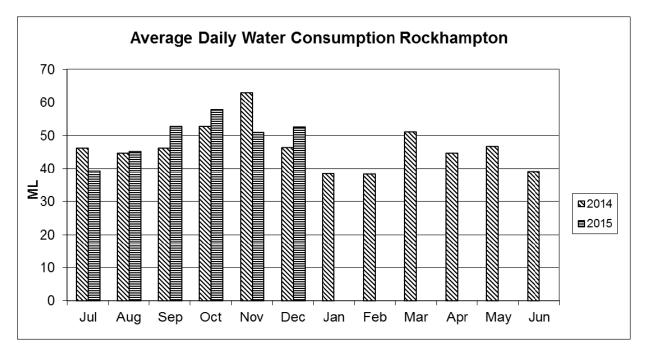

The concentration of sodium in drinking water supplied from the GWTP during December increased to be 40 mg/L. The current level of sodium is above the Water Quality Objective value of 30 mg/L but is well beneath the aesthetic guideline of 180 mg/L for sodium in the Australian Drinking Water Guidelines. The sodium concentration is expected to continue to increase gradually before the receipt of normal wet season rainfall within the next few months.

| Drinking Water Quality as at 2 December 2015 |      |      |  |  |  |
|--|------|------|--|--|--|
| Parameter Rockhampton Mount Morgan           |      |      |  |  |  |
| Total Dissolved Solids (mg/L)                | 310  | 200  |  |  |  |
| Sodium (mg/L)                                | 40   | 32   |  |  |  |
| Electrical Conductivity (uS/cm)              | 470  | 280  |  |  |  |
| Hardness (mg/L)                              | 130  | 60   |  |  |  |
| рН   | 7.59 | 7.01 |  |  |  |

The table above shows the results of drinking water testing in Rockhampton and Mount Morgan for selected water quality parameters.

#### Drinking Water Supplied

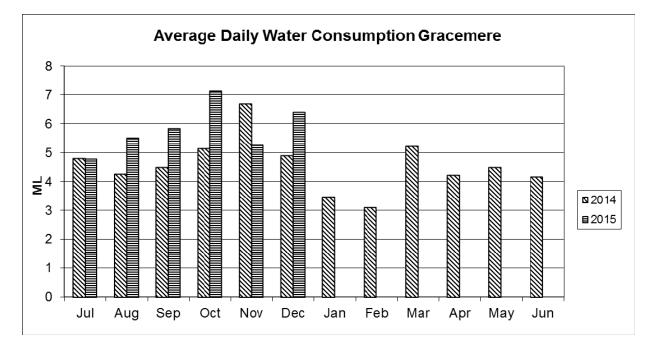

Data is presented in graphs for each water year (e.g. 2014 is the period from July 2014 to June 2015).

#### **Rockhampton**

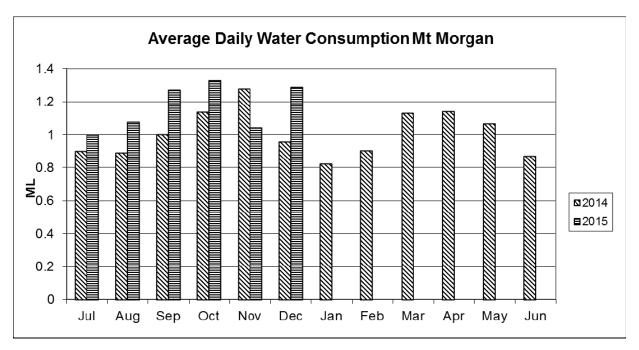

Average daily water consumption in Rockhampton during December (52.67 ML/d) increased slightly from that reported in November and was greater than that reported in the same period last year. The increased consumption was due to the warmer weather and limited amount of rainfall received during the month. The Fitzroy Barrage Storage is currently at 91% of accessible storage volume and is therefore well above the threshold in the Drought Management Plan used to trigger the implementation of water restrictions.

#### **Gracemere**

Average daily water consumption in Gracemere during December (6.39 ML/d) increased compared to that reported in November and was much greater than that reported in the same period last year. The increased consumption was due to the warmer weather and limited amount of rainfall received during the month. The Fitzroy Barrage Storage is currently at 91% of accessible storage volume and is therefore well above the threshold in the Drought Management Plan used to trigger the implementation of water restrictions.

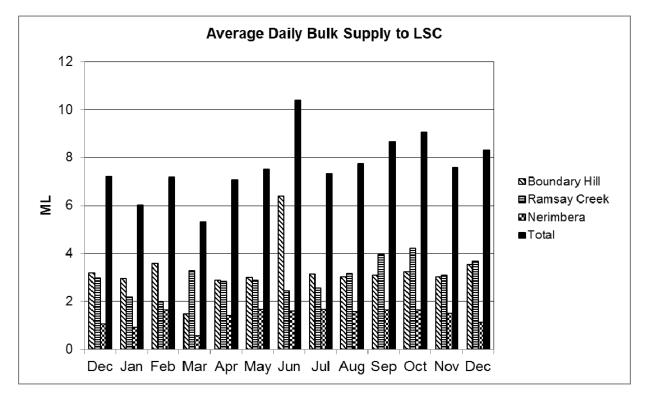

Mount Morgan

Average daily water consumption in Mount Morgan during December (1.29 ML/d) increased compared to that reported in November and was much greater than that reported for the same period last year. The increased consumption was due to the warmer weather and limited amount of rainfall received during the month. The No. 7 Dam is currently at 67% of accessible storage volume, well above the 50% storage threshold value in the Drought

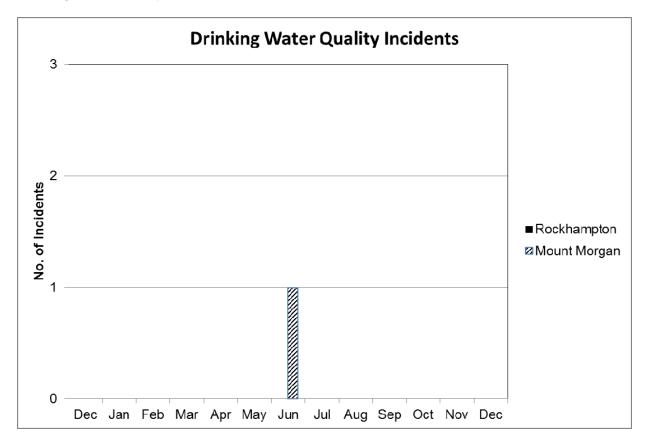

Management Plan that is used to trigger the implementation of water restrictions in Mount Morgan.

The average daily volume of water supplied to LSC increased during December compared to that recorded in November to be 8.31 ML/d. This volume is greater than the volume recorded for the same period last year. The recent increase was primarily due to an increase in the volume of water supplied from the Boundary Hill and Ramsay Creek sites during this period.

#### **Drinking Water Quality Incidents**

No water quality incidents occurred during the month of December. Only one water quality incident has occurred in the last three years.

#### **Drinking Water Quality Complaints** 180 160 140 120 No. of complaints 100 Rockhampton Mount Morgan 80 60 40 20 Ø 0 0 Ø 0 Dec Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec

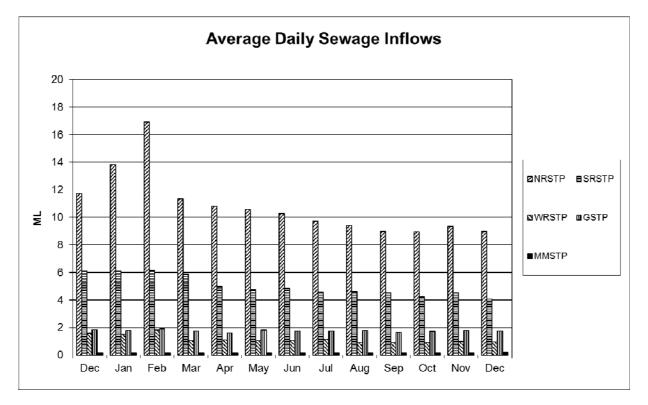

#### Drinking Water Quality Complaints

|                | Elevated<br>Chlorine | Taste/Odour/Quality | Discoloured<br>Water | Physical<br>Appearance<br>(e.g. residue or<br>air) |
|----------------|----------------------|---------------------|----------------------|--|
| No. Complaints | 0                    | 2                   | 3                    | 0  |

The total number of drinking water quality complaints (5 complaints) received during December decreased from the number of complaints received in November.

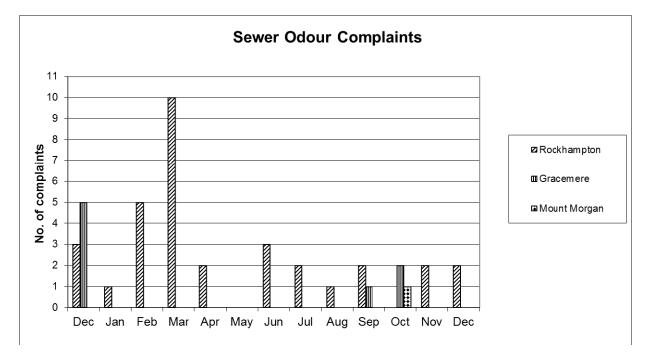

Four complaints were received from customers in Rockhampton and the other from a customer in Mount Morgan. The three discoloured water complaints were probably due to the release of some discoloured material from pipe surfaces during periods of high demand and therefore high water velocity through the pipes. The other two complaints were associated with an unfavourable taste in the water at the customer's property. All complaints were resolved by flushing the water mains to clear the water provided to the customer.

#### Sewage Inflows to Treatment Plants

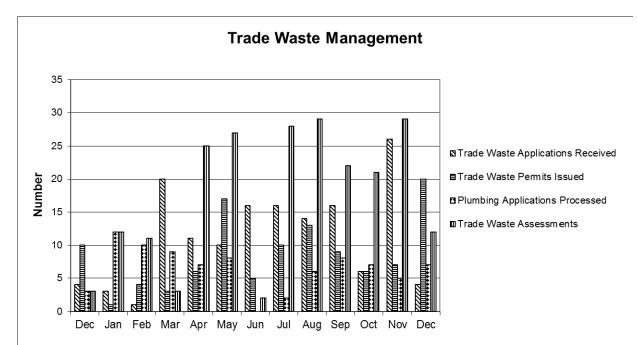

Average daily sewage inflows during December were slightly lower at each STP from that reported in November due to the relatively low amount of rainfall received during the month and probably also the absence of many customers to the holiday season. The overall level of inflow is now at long term dry weather levels with groundwater infiltration negligible due to the recent dry weather.

#### Sewer Odour Complaints

Two sewer odour complaints were received during the month of December, the same number as that reported in November. Both complaints were received from customers in Rockhampton with one complaint associated with the sewerage network and the other due to some work being done with biosolids at the South Rockhampton STP. The odour associated with the biosolids was relatively short-lived and the customer was quite supportive of FRW's new beneficial use of biosolids on the nearby agricultural land.

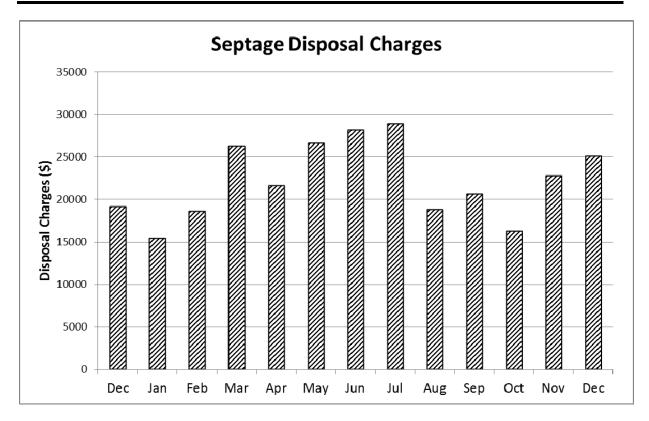

Trade Waste and Septage Management Activities

Four Trade Waste applications were received and 20 Trade Waste Permits were issued during December. Seven Plumbing Applications were processed and 12 Trade Waste Assessments were completed by the team.

The table below shows those Permits which contained a significant change either to their Category rating or due to the inclusion of a Special Condition in order to comply with Council's Trade Waste Environmental Management Plan.

| Industry/Trade             | New or<br>Renewal | Permit<br>Category | Special Condition  | Comments                     |
|----------------------------|-------------------|--------------------|--|------------------------------|
| Mechanical<br>Workshop     | Renewal           | From 1 to 2        | Business decided to<br>install a trade waste<br>discharge meter. | Installation within 30 days. |
| Restaurant and<br>Takeaway | New               | 1                  | Final Plumbing<br>Certificate not issued.                        | Nil                          |
| Early Learning<br>Centre   | New               | 1                  | Business required to install a grease trap.                      | Nil                          |

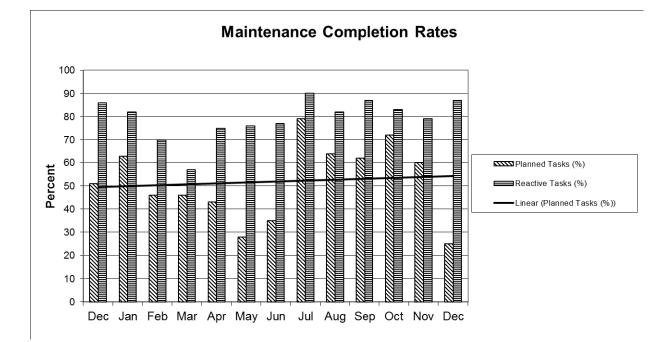

Charges for the disposal of septage liquid waste at the North Rockhampton STP increased slightly during December compared to November. The increase in the monthly income received does not appear to be associated with any specific factor.

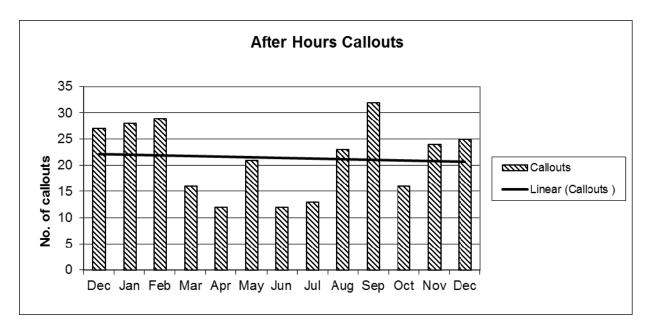

#### Treatment and Supply Maintenance Activities

The table below shows the breakdown of work completed based on the category of the work activity.

| Maintonanaa Tyra         | Work Category |            |         |          |  |  |
|--------------------------|---------------|------------|---------|----------|--|--|
| Maintenance Type         | Electrical    | Mechanical | General | Operator |  |  |
| Planned                  | 7             | 12         | 55      | N/A      |  |  |
| Reactive                 | 49            | 33         | 1       | N/A      |  |  |
| After hours callouts     | 16            | 6          | 0       | 1        |  |  |
| Capital                  | 2             | 0          |         |          |  |  |
| Safety and<br>Compliance | 59            | 18         | 0       | 7        |  |  |

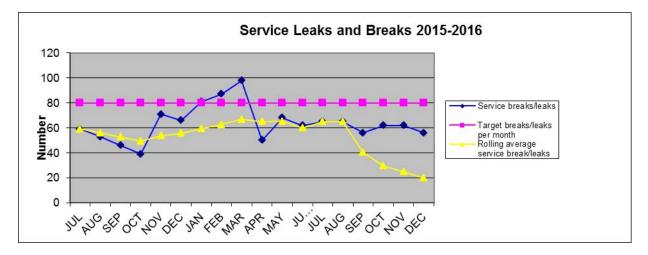

A total of 300 preventative maintenance activities were scheduled and 135 reactive maintenance activities were requested during the month of December. Completion rates for each type of maintenance activity by the end of the month were 25% and 87% respectively. The lower than expected completion rate for planned maintenance was due to some ongoing reactive maintenance tasks being completed as a priority. Upcoming capital upgrade projects (e.g. Arthur St SPS upgrade, Gracemere STP New Inlet Works) are expected to significantly reduce this reactive maintenance demand.

The number of after-hours call-outs for electrical and mechanical reactive maintenance (25 call-outs) increased slightly during December compared to November. The number of callouts was greater than the 12 month rolling average of 20 call-outs per month. The trend line in the graph indicates an overall decrease in call-outs. In the majority of cases, the faults were rectified within the targeted rectification time according to the Priority Ratings used to rank reactive maintenance events.

### **NETWORK SERVICES**

#### **Regional Service Leaks and Breaks**

#### Performance

#### Target achieved.

#### Issues and Status

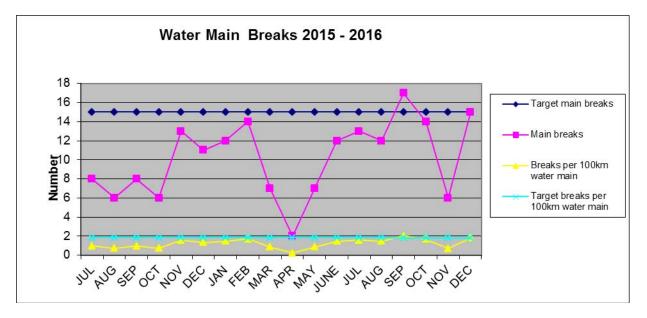

Maintenance records indicate a high percentage of service breaks and joint failures consistently occurring on poly services.

#### Response to Issues

Water services subject to two failures are being replaced under the capital replacement programme to minimise the risk of failure.

| Locality       | Service Leaks / Breaks |
|----------------|------------------------|
| Rockhampton    | 56                     |
| Mount Morgan   | 0                      |
| Regional Total | 56                     |

#### Regional Water Main Breaks

#### Performance

Target achieved.

**Issues and Status** 

The high count of AC mains experiencing breaks is noted.

The following table shows the number of breaks per month.

| Water main<br>type | October 2015 | November 2015 | December 2015 |
|--------------------|--------------|---------------|---------------|
| Cast Iron          | 4            | 1             | 1             |
| AC                 | 6            | 4             | 12            |
| PVC                | 3            | 1             | 1             |
| Mild Steel         | 0            | 0             | 0             |
| Poly               | 1            | 0             | 1             |
| TOTAL              | 14           | 6             | 0             |

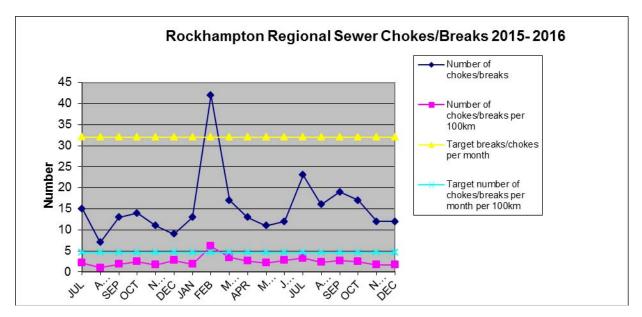

#### Response to Issues

Continued defect logging and rectification will reduce failure occurrences.

|          | Number of<br>Main Breaks | Target Main<br>Breaks | Breaks per<br>100 km | Target<br>Breaks per<br>100 km | Rolling<br>average per<br>100 km |

| Regional Total | 3          | 12        |  |

#### Rockhampton Regional Sewer Connection Blockages

#### **Performance**

#### Target achieved

#### **Issues and Status**

Data indicates blockages are been caused by broken pipes due to age, and tree root intrusion.

#### Response to Issues

Continue to assess properties with repeat breaks and chokes for inclusion in the capital sewer refurbishment programme.

|          | Number of<br>connection<br>blockages | Target<br>connection<br>blockages<br>per month | Number of<br>connection<br>blockages<br>per 1,000<br>connections | Target number<br>of connection<br>blockages per<br>1,000<br>connections | 12 month<br>average per<br>1,000<br>connections |

There was one application pending further advice from the applicant, being for:

The receipt address does not match the application (1).

There was one application declined, being for:

• The receipts were older than 12 months old (1).

#### Water Meters

The second quarter reads for 2015/16 were completed before 1 December 2015. No water meters were read during the month of December and approximately 15,400 accounts being for sectors 7, 8, 9, 10, 17 & 18 were issued to customers. Third quarter meter reads will commence on 12 January 2016.

| Sectors Read for December |  |  |  | Total |
|---------------------------|--|--|--|-------|
| No. of meters in Sector   |  |  |  |       |
| No-Reads                  |  |  |  |       |
| % Of No-Reads             |  |  |  |       |

Special Water Meter Reads

| Reading Type  | No. of Reads | \$ Value    |
|---|--------------|-------------|

#### Building Over Sewers

The following summary is an overview of the core business activity that requires ongoing negotiations with the respective stakeholders and detailed investigations to determine location and condition assessments of the associated infrastructure.

#### Activity Summary

|                         | December | FYTD |  |  |  |  |
|-------------------------|----------|------|--|--|--|--|
| General enquiries       | 27       | 180  |  |  |  |  |
| Site investigations     | 12       | 62   |  |  |  |  |
| Approval Permits issued | 1        | 4    |  |  |  |  |
| Permits closed          | 5        | 15   |  |  |  |  |
| Total                   | 45       | 261  |  |  |  |  |

#### Building Over Sewer Applications under Assessment

There are no permits currently under assessment as at 31 December 2015.

#### OPERATIONS AND PLANNING

#### North Rockhampton Flood Mitigation Project

The 2015/16 program of access chamber refurbishment works related to the North Rockhampton Flood Mitigation Project has been issued to Mainmark Civil and Mining, with construction works progressing well. This 2015/16 program of works will focus on the refurbishment of access chambers located on the outside of the proposed future levee up to and including the 8.5m flood level. This \$250,000 project will be funded from the 2015/16 Sewer Main Relining budget.

#### Sewer Main Relining Program

The 2015/16 sewer main relining program has been issued to Abergeldie Watertech. With a budget allocation of \$300,000, this program of works will still target segments of sewer main which have experienced blockages in recent times, along with main lines identified through FRW's building over sewer assessments and ongoing CCTV inspection program. Unlined segments of sewer main associated with the current and future stages of the North Rockhampton Flood Mitigation project will also be assessed for inclusion in the program of works. Works on this relining program are to commence 18 January 2016.

#### System Leakage Management

The 2015/16 financial year continues to see the commissioning of a number of key flow monitoring sites within the network. With the flow meter installations being completed in previous financial years, the focus will continue to be on the installation of telemetry required in order to receive information back through SCADA to the GWTP. There is also sufficient budget allocation to allow for the installation of a number of new flow meters within the Athelstane gravity supply zone, along with the refurbishment of existing sites. Once identified scope/design of these projects will begin. Projects may also be identified by

Infrastructure Planning's ongoing review of the 2010 System Leakage Management Plan. Draft of the 2015 System Leakage Management Plan is currently with FRW for review.

#### ADMINISTRATION MATTERS

#### Dial Before You Dig (DBYD)

The average number of requests received per day for December was 4.61.

|                       | October 2015 | November 2015 | December 2015 | FY Total |
|-----------------------|--------------|---------------|---------------|----------|
| Requests<br>Processed | 172          | 183           | 143           | 1216     |

#### Site Tours

There were no site tours of the Glenmore Water Treatment Plant (GWTP) held in December.

#### Customer Service Performance

FRW has an internal service level agreement with Finance and Business for the provision of customer service related functions including:

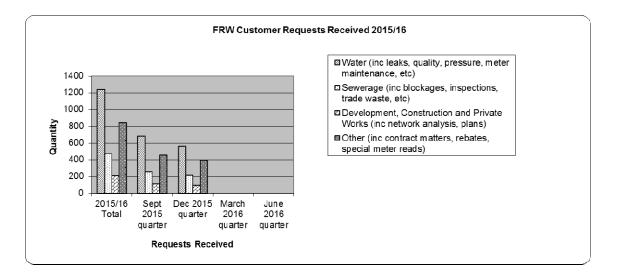

- 1. Face to Face Customer Support.
- 2. 24 Hour Telephone Contact Service.
- 3. Acceptance of Payment.

The following table summarises customer contacts made via the telephone and face to face at the Council Customer Service Centres. These customer contacts are then addressed by FRW.

Table 1: Customer Contact

2nd quarter – 1 October to 31 December 2015

| Customer Contact Type  | 2nd<br>Quarter<br>2015/16 | 2nd<br>Quarter<br>2014/15 | Total<br>2015/16<br>Year | Total<br>2014/15<br>Year | Total<br>2013/14<br>Year |  |

#### Communication and Education

#### Media releases

The Regional Communications team is continuing to attend the Executive Management Team meetings. We have also re-established fortnightly meetings with FRW management specifically to ensure full understanding of projects and upcoming media and marketing opportunities.

#### Public notices

A public notice regarding water pressure fluctuations in Mount Morgan appeared in the Morning Bulletin on 5 December 2015.

#### Other promotions

FRW took up an advertising opportunity with the morning Bulletin, wishing readers a Merry Christmas and Happy New Year. This appeared in two editions.

#### INFRASTRUCTURE PLANNING

Sewer Network Investigations

Sewer Area Maps No further development.

Sewer Catchment Area Maps No further development.

*Gracemere Effluent Main Link* No further development.

North Rockhampton Flood Mitigation Investigation (NRFM) No further development.

*Mt Morgan Sewerage Strategy* No further development.

West to South STP Transfer With the Civil Design team.

Parkhurst Sewerage Pump Station Implementation Strategy No further development.

*Gracemere – Fisher Street Sewerage Pump Station* No further development.

#### Water Network Investigations

*Water Area Maps* No further development.

*Mt* Archer – Fire Hydrant Installation With FRW.

Gracemere – Lucas Street Pump Station Augmentation Concept designs currently under review following further discussions to on proposed valves and construction staging.

*Mt Morgan – Future Water Supply* No further development.

*Water Meter – Thematic Mapping of Consumption* No further development.

<u>System Leakage Management Plan</u> Draft review of SLMP has been completed and passed onto FRW for review.

#### Water Loss Calculations

The following water loss results were reported in the December customer service standards quarterly report.

| Water Supply<br>Scheme | Water loss per Connection 2015<br>(Litre per day) |      |           |          |  |  |  |  |  |  |
|------------------------|---|------|-----------|----------|--|--|--|--|--|--|
| Scheme                 | March   | June | September | December |  |  |  |  |  |  |
| Rockhampton            | 178   | 240  | 167       | 177      |  |  |  |  |  |  |
| Mount Morgan           | 106   | 229  | 184       | 170      |  |  |  |  |  |  |

#### FINANCIAL MATTERS

#### **Operational**

Revenue is currently 51.1% of the Adopted budget. Most revenue streams are on target.

Gross water consumption revenue is 50.2% of adopted budget with 100% of first half of the year billed. At this juncture overall billed consumption is 8.5% above that of last financial year for the corresponding quarters. The commercial sector consumption is slightly above that compared to the same time in 2014/2015, whilst the residential sector has increased consumption by 12.7%. Gross water and sewerage access charges are on target. General private works income is above target. Fees & charges revenue is slightly above target. Bulk water sales are on target when removing advanced charges impact and adding arrears charges.

Expenditure year to date is 51.8% of the Adopted Budget. The majority of expenditure streams are slightly above target. Two that remain quite ahead of target are contractors and competitive neutrality adjustments. The treatment & supply unit and network service unit continue to monitor contractor and consultants costs as it continues to maintain an upward trend.

There are no material exceptions to report.

#### <u>Capital</u>

Capital expenditure is below the percentage of year elapsed at 33.6% in comparison to the October revised budget. Expenditure during December has decreased by approximately \$400,000 compared to November. This is expected during the Christmas period.

Water YTD 40.83% and Sewer YTD 24.83%.

Networks YTD 48.46% and Treatment YTD 21.83%.

The areas of prominent activity are the Arthur St electrical upgrade, North Rockhampton flood mitigation project Stage 2, Mt Morgan sewer Stage 2, Water trunk main duplication to Gracemere and Water Main Replacement programs.

There are no material exceptions to report.

#### Sundry Debtors

Below is a summary of aged sundry debtor balances at the end of December 2015. The 90+ day balances are either on payment plans, the business is in administration or the debt is with Collection House.

|                     | Balance      | 0-30 Days   | 30-60 Days  | 60-90 Days | 90+ Days     |
|---------------------|--------------|-------------|-------------|------------|--------------|
| No. of<br>Customers | 119          | 45          | 18          | 32         | 57           |
| Total Value         | \$286,492.41 | \$82,715.69 | \$55,646.67 | \$7,492.94 | \$140,637.11 |

Below is an explanation of the debtor types, being a mixture of standpipes, irrigators, emergency works and effluent usage.

| 90+ days    | Comments   |
|-------------|--|
| \$3,794.68  | Trade Waste debts - Collection attempts unsuccessful, other avenues to   |
|             | be investigated  |
| \$6,706.87  | Septic disposal – Administrators appointed – recovery unlikely   |
| \$851.72    | Trade Waste debts to be written off  |
| \$1,743.88  | Irrigators – been to collection – unsuccessful – looking at further action to sell allocation                                |
| \$3,581.96  | Long Term Payment Plans - Mt Morgan Sewerage Connections -<br>Recovery will occur  |
| \$8,215.29  | Other Payment Plans – Private Works/Standpipe  |
| \$740.40    | Debtors currently at collection  |
| \$672.64    | Sold water allocations – final invoices before transfer date   |
| \$33,478.62 | Other Overdue Debt with no fixed arrangements – Trade Waste, Irrigators, Standpipes, Emergency works – Overdue letter issued |
| \$61,262.80 | Not 90+ Overdue - transactions date relates to June 15 but invoice only raised 30 Nov 2015                                   |
| \$19,588.25 | Not FRW  |
| 60-90 Days  | Comments   |
| \$2,234.91  | Standpipes (includes \$624.31 from 5 debtors with 90+days)   |
| \$5,258.03  | Irrigators (includes \$1,501.38 from 5 debtors in 90+ days)  |
| 30-60 Days  | Comments   |
| \$7,648.20  | Standpipes (includes \$1,481.04 from 5 debtors that have 90+ days)   |
| \$64.15     | Irrigator  |
| \$1,176.65  | Septic disposal  |
| \$260.63    | Trade Waste  |
| \$10,561.06 | Emergency Private Works  |
| \$35,935.98 | Not FRW  |

A summary of financial performance against budget is presented below:

| 26                                | As At End Of December 2015       |                   |                    |              |                    |          |                 |  |  |  |  |
