5 Policy Statement

Section 198 of the Regulation stipulates that Council must prepare and adopt a procurement policy detailing the principles, including the sound contracting principles, that Council applies to its procurement activities, including the disposal of assets. Council has adopted the default contracting procedures as outlined in the Regulation.

As defined by section 104 of the Act, the sound contracting principles include:

- a) Value for money;
- b) Open and effective competition;
- c) The development of competitive local business and industry;
- d) Environmental protection; and
- e) Ethical behaviour and fair dealing.

5.1 Sound Contracting Principles

Council officers must have regard to the following sound contracting principles in all procurement activities.

5.1.1 Value for Money

In undertaking any Council procurement activity, the objective is to obtain goods and services of the most suitable quality at the lowest whole of life cost which is consistent with the fitness for purpose of the requirements being procured and at an acceptable level of risk. This does not necessarily mean selecting the lowest priced goods or services. Value for money considerations include:

- (a) Whole-of-life costs including acquisition, use, maintenance and disposal;
- (b) Fitness for purpose, quality, service and support;
- (c) Risk exposure, the terms and conditions governing the acquisition should allocate the risks to the party best able to manage them;
- (d) Internal administration costs;
- (e) Technical compliance costs; and
- (f) Establishment of pre-qualified supplier and preferred supplier arrangements for goods and/or services required on a recurring basis to improve negotiating leverage for Council as a whole.

5.1.2 Open and Effective Competition

Procurement activities must be conducted using an open and competitive process unless a specific exception applies under Chapter 6, Part 3, Divisions 3 and 4 of the Regulation. Open and effective competition is achieved by ensuring:

- (a) Procurement processes are visible and transparent to suppliers and the public;
- (b) Evaluation criteria and weightings are disclosed in procurement processes, and evaluations are undertaken in accordance with Council procedures;
- (c) Requirements are planned well in advance to enable sufficient time to adequately source competitive bids;
- (d) Specifications are as explicit as possible, and focus on performance, function, and/or technical and physical characteristics (as opposed to brand and manufacturer); and
- (e) The market place is continually researched to identify new suppliers/products and enable effective use of competition in seeking offers.

5.1.3 The Development of Competitive Local Business and Industry

Council encourages the development of competitive local businesses and endeavours to promote and support competitive industry while conducting its procurement activities. In addition to price, capability, performance, quality and sustainability, Council also considers the following:

- (a) Creation of employment opportunities within the Region;
- (b) Economic growth for the Region;

- (c) Readily available goods, services and support; and
- (d) The associated benefits to local commercial transactions that flow from these engagements.

The Local Preference Policy provides further information regarding the benefits of using local suppliers and details the mandatory evaluation criteria which must form part of the evaluation process for all procurement activities.

5.1.4 Environmental Protection

Council seeks to use its' considerable purchasing power to lead by example and positively influence businesses, industries and the community to protect the environment and support environmentally sustainable goods and services. In doing so, Council incorporates sustainable procurement principles in all purchasing decisions and considers a range of environmental factors including:

- (a) Procurement of environmentally responsible products, services, works and assets;
- (b) The whole-of-life benefits, costs and impacts of products and services (throughout their manufacturing, supply, use, maintenance and disposal), ensuring perceived short term value does not override long term costs that run counter to circular economy principles;
- (c) Devising strategies that reduce demand and extend the life of products (this may include examining organisation/project needs and avoiding, re-using or re-purposing if appropriate);
- (d) The environmental performance of prospective contractors and suppliers, as well their use of emission reduction actions relevant to their products and services;
- (e) Encouraging (and if possible mandating) sustainable solutions and innovation in tenders;
- (f) The environmental impact and performance of a product or service, with consideration of energy/water/fuel efficiency, recycled content, recyclable products, low toxicity levels, product origin and relevant certifications heavily weighted; and
- (g) Planning end-of-life product management at project outset and encouraging suppliers to do the same.

5.1.5 Ethical Behaviour and Fair Dealing

All employees involved in procurement activities must behave with impartiality, openness, integrity and professionalism whilst maintaining confidentiality in their dealings with suppliers. In the context of Council procurement activity, behaving ethically is achieved by observing the Code of Conduct and by having regard for the welfare of others. This includes:

- (a) Performing duties with impartiality and integrity in dealings with suppliers;
- (b) Treating information relating to suppliers as "commercial in confidence" and only disclosing such information to other employees or parties on a strict "need to know" basis;
- (c) Ensuring all written bids and other information submitted by suppliers is kept in a secure location when not in use;
- (d) Utilising open and accountable procurement methods;
- (e) Promoting professional procurement practices;
- (f) Maintaining systems and procedures which ensure a consistent approach to procurement;
- (g) Providing advice to suppliers on how to do business with Council;
- (h) Not engaging in any misleading or deceptive conduct towards suppliers;
- (i) Not making improper use of information relating to suppliers or to Council;
- (j) Not taking personal advantage of an opportunity that properly belongs to Council or a supplier;

- (l) Not entertaining approaches from suppliers that may be interpreted as attempts to influence the procurement process;
- (m) Not participating in any transaction between Council and any supplier in which they have an undisclosed interest;
- (n) A high regard for inclusive and accessible work environments that promote employment opportunities for people of all backgrounds and abilities, including support for First Nations businesses; and
- (o) Ensuring all purchase decisions consider the rights and wellbeing of people and communities involved in both direct business and supply chains.
