8. STATEMENT OF REASONS

Description of the development	Reconfiguring a Lot (one lot into two lots)
Reasons for Decision	<p>a) Assessment of the development against the relevant zone purpose, planning scheme codes and planning scheme policies demonstrates that the proposed development will not cause significant adverse impacts on the surrounding natural environment, built environment and infrastructure, community facilities, or local character and amenity; and</p> <p>b) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.</p>
Assessment Benchmarks	<p>The development was assessed against the following assessment benchmarks:</p> <ul style="list-style-type: none"> • Strategic Framework; • Low Impact Industry Zone Code; • Airport Environs Code; • Biodiversity Overlay Code; • Flood Hazard Overlay Code; • Steep Land Overlay Code;

	<ul style="list-style-type: none"> • Reconfiguring a Lot Code; • Access, Parking And Transport Code; • Landscape Code; • Stormwater Management Code; • Water and Sewer Code; and • Filling and Excavation Code. 	
Compliance with assessment benchmarks	The development was assessed against all of the assessment benchmarks listed above and complies with all of these with the exceptions listed below.	
	Assessment Benchmark	Reasons for the approval despite non-compliance with benchmark
	Flood Hazard Overlay Code PO14	<p>The proposed subdivision involves the creation of a new lot that is subject to Creek Catchment Planning Area 2 and therefore does not comply with Acceptable Outcome (AO) 14.1 or Performance Outcome (PO) 14.</p> <p>The subject site is marginally affected by Creek Catchment Planning Area 2. In accordance with that component of the Flood Hazard Overlay, it is apparent that only the frontage of the subject site is impacted by flood hazard from the Splitters Creek Catchment. The vast majority of the site remains flood-free and is suitable for industrial development. Furthermore, the updated flood modelling presented in the Planning Scheme Major Amendment – Local Catchment and Riverine Flood Mapping (Draft Planning Scheme Version 4) shows a reduction to Creek Catchment Planning Area 2 to the point of it being non-existent on the site.</p> <p>In contrast to the reduction of flood hazard to the site itself as noted above, Maloney Street and Quinn Street are substantially affected by localised flood hazard within the Splitters Creek catchment with increased risk within the road reserves, with implications to the proposed access to Proposed Lot 41 in particular. Therefore, ensuring safe and effective access to and from the site is the primary consideration in relation to the localised flooding from the Splitter’s Creek Catchment.</p> <p>In response, the applicant has proposed a secondary component of the development to establish access easements over Lot 1 on LN839307 and Proposed Lots 40 and 41. These easements are intended to be used for emergency access and evacuation, when necessary, in the instance of a significant flood event that may prevent safe access from the regular driveway to Proposed Lots 40 and 41.</p> <p>Accordingly, the development would therefore comply with the relevant Overall Outcomes (e and f) when reasonable consideration is given to the most recent flood modelling and Draft Flood Hazard Overlay. The land itself is only marginally</p>

		<p>impacted by Creek Catchment Planning Areas and reasonable precautions have been undertaken to ensure the site is resilient and can effectively respond to flood events.</p> <p>The proposal is therefore considered to achieve the desired intent of the Purpose and Overall Outcomes of the Flood Hazard Overlay Code despite some conflict with parts of the applicable assessment benchmarks (AO14,1 and PO14).</p>
	Reconfiguring a Lot Code PO7	<p>The proposed subdivision does not comply with Acceptable Outcome (AO) 7.1 and Table 9.3.5.3.2 as Proposed Lot 41 has a depth of approximately 36.7m which is slightly less than the prescribed minimum of 40m. Additionally, some parts of Proposed Lot 40 are also less than the prescribed minimum depth due to the slightly irregular shape and layout of the lot. The site is bounded and constrained to the north by Splitter's Creek. Both proposed lots achieve all other prescribed minimum dimensions (lot size area, frontage width).</p> <p>The small shortfalls in lot depth are unlikely to have a negative impact on the functionality of the site to be used for industrial purposes. The overall size of each lot (Lot 40 – 3,314m²; Lot 41 – 1,202m²) ensures sufficient developable and operational area to achieve the following performance outcomes for existing or potential industrial activities:</p> <ul style="list-style-type: none"> • Appropriate buildings and structures; • Adequate useable open space and landscaping; • Ventilation and sunlight; • Suitable vehicle access and on-site parking where required; and • Any required on-site services and infrastructure. <p>Therefore, on the balance of assessment, the development is considered to comply with Performance Outcome (PO) 7.</p>
	Reconfiguring a Lot Code PO11	<p>The proposed subdivision does not fully comply with Performance Outcome (PO) 11 as proposed Lot 40 is not rectangular in shape due to positioning and location of the Proposed Lot 41. Despite this, the development complies with all other parts of PO11 and is consistent with the Purpose and Overall Outcomes of the Reconfiguring a Lot Code.</p>
Matters raised in submissions	No submissions were received during public notification for the application.	
Matters prescribed by regulation	<ul style="list-style-type: none"> • The <i>Rockhampton Region Planning Scheme 2015</i> (version 2.2); and • The common material, being the material submitted with the application.
