7. STATEMENT OF REASONS

Description of the development	
Building Works Assessable against the Planning Scheme for a Carport (6.5 metres x seven (7) metres).	
Reasons for Decision	
a) Assessment of the development against the Character Overlay Code demonstrates that the proposed development will not cause significant adverse impacts to the local character and amenity; and b) On balance, the application should be approved because the circumstances favour Council exercising its discretion to approve the application even though the development does not comply with an aspect of the assessment benchmarks.	
Assessment Benchmarks	
The development was assessed against the following assessment benchmark: Character Overlay Code.	
Compliance with assessment benchmarks	
The development was assessed against the assessment benchmark listed above and complies with all, with the exception listed below.	
Assessment Benchmark	Reasons for the approval despite non-compliance with benchmark
Character Overlay Code	Performance Outcome (PO) 8 The proposed development does not comply with Acceptable Outcome (AO) 8.1.2 (b), (c) and (e) for an open carport located in front of the main building.

	In accordance with AO8.1.2 an open carport located in front of the main building: (b) is to be designed with a maximum width of 3.6 metres; (c) must have a maximum height of four (4) metres above ground level; and (e) have a minimum roof overhang of thirty (30) centimetres. The alternative outcome proposed is a 6.5 metre wide carport fitted with a panel lift door facing the road frontage and open on the side and rear. The proposed carport has a height of approximately 4.5 metres and is located four (4) metres closer to the road frontage than the existing dwelling house with a roof overhang of less than 30 centimetres on each side. The proposed carport structure is not anticipated to be a prominent feature and is ancillary in scale with the main house being located on the lower side of the gently sloping site. The partly open structure is not expected to be visually dominant when viewed from the street because: • The height of the proposed carport (approximately 4.5 metres) to the apex of the gable roof is under the height limitation for the low density residential area. • The gable roof design is consistent with the character of the surrounding built environment. The 20 degree pitch and 30 centimetre overhangs on the front and rear are compliant with the Acceptable Outcomes for Carports within the Character Overlay. • The building materials are consistent with the existing dwelling house and the feature gable end and cladding contribute to the overall character of the carport which is aligned with the character features of surrounding properties; and • The partly open structure has a panel lift door for security but will not dominate the subject site when viewed from the street as the location of the proposed carport is to the side of the existing dwelling house. Therefore, the proposed development is taken to comply with PO 8.
Relevant Matters	
Not applicable to an assessable development application subject to code assessment.	
Matters prescribed by regulation	
• The Rockhampton Region Planning Scheme 2015 (version 4.4); and • The common material, being the material submitted with the application.
