Search planning rules
for a property

Track a
Development Application

Rock e Plan is Rockhampton Regional Council's online planning and development service.

Rock e Plan consists of four components that allows the community to view and search:

- Council's Planning Scheme
- Planning Scheme Maps
- Planning provisions (rules) for properties
- Track development applications

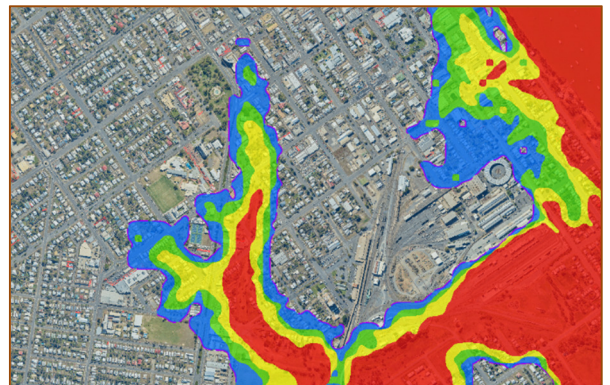

Rockhampton Region Planning Scheme 2015

The planning scheme sets out objectives, policies and provisions for the use, development and protection of land for the Rockhampton region.

Planning Scheme Maps

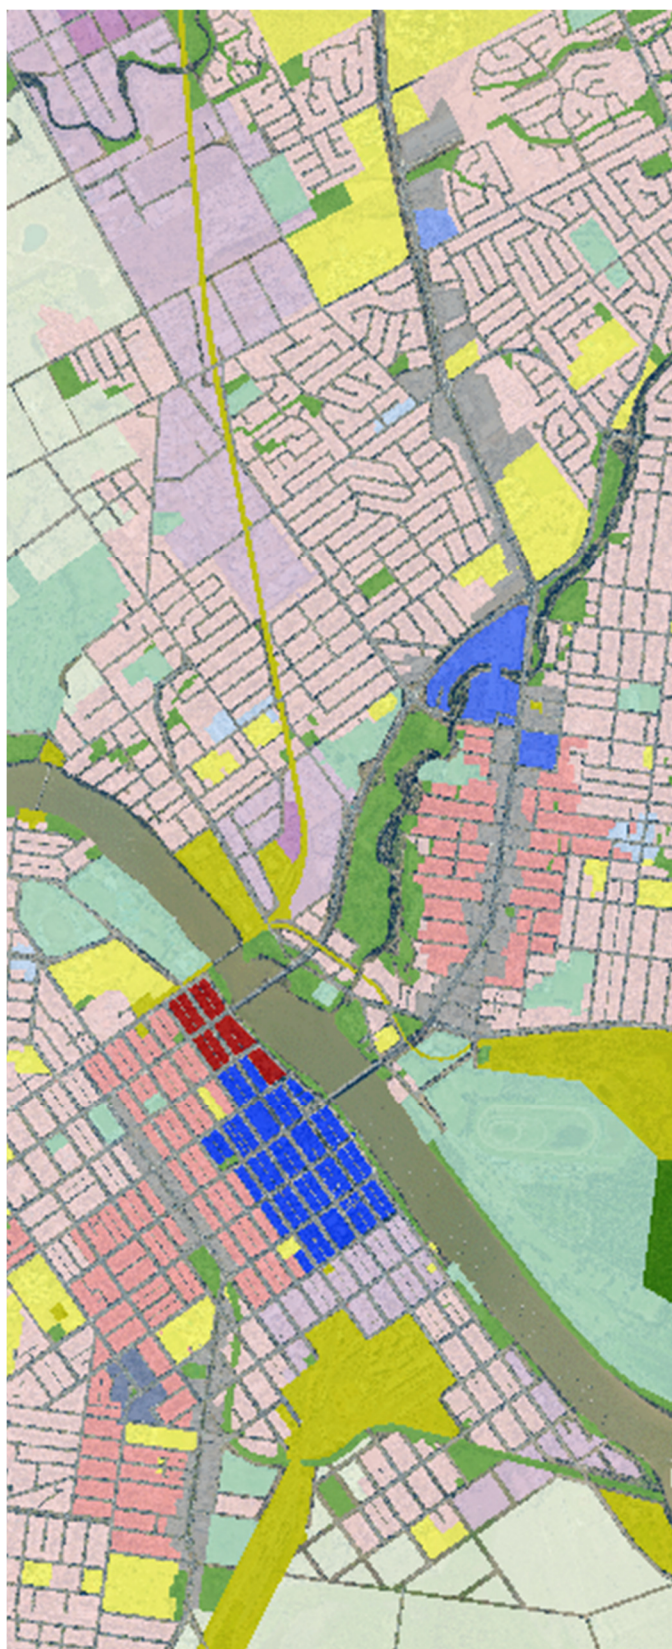

The planning scheme's interactive maps provides users with the ability to search properties and view detailed planned areas such as zones, overlays and infrastructure in the Rockhampton region.

Planning scheme maps are a useful tool for many people including developers, investors or property owners, to see how a property may be affected by the *Rockhampton Region Planning Scheme 2015*.

Full Planning Enquiry

Rock e Plan's full planning enquiry provides the community with a portal to search the planning rules for a property and the development type, activity or use proposed for a property.

The property search can provide a quick snapshot of the zone, precincts and overlays applicable to any property in the Rockhampton region, similar to the information provided on a Limited Town Planning Certificate.

Continuing through to the development activity search will step users through a number of questions to determine the level of assessment and permits required for any proposed development on the selected site.

Track Development Applications

Provides the public the ability to search the status and details relating to development applications.

How to use

User guides on how to navigate and search all four components can be found on the Rock e Plan home page.

Where to find Rock e Plan

Rock e Plan can be found on the home page of the Rockhampton Regional Council's website.
